**Ecology Wars** Ron Arnold, 1993 This book is about ecology wars Ecology wars are fought in legislatures courtrooms and the hearts and minds of men and women Keep one fact in mind while you read this book Ecology isn't environmentalism Nobody seems to notice but ecology is a science Environmentalism is a social movement an ecologist is a qualified professional in ecology the science of how organisms interrelate with their environments An environmentalist is anyone who claims to be one This is a crucial distinction to keep in mind **Ecology Wars** Ron Arnold, 1993-08-01 Takes industry to task for failing to protect the jobs of its employees and the economic security of its communities through timid efforts to combat overzealous environmentalists and grasping bureaucracies **Environmental and Animal Rights Extremism,**

**Terrorism, and National Security** Elzbieta Posluszna, 2015-01-29 As concerns about human treatment of the environment and animals have increased over the years so have decentralized and extremist groups related to these causes Environmental and Animal Rights Extremism Terrorism and National Security analyzes the international development of radical movements relating to environmental concerns and animal rights in the context of the threats they pose to national security In addition to tracing the factors responsible for the rapid growth of these movements over the last 25 years this text presents countermeasures that governments can deploy to neutralize the risk posed by these threats now and in the future Bringing to bear new developments such as cyber activity and online activism Environmental and Animal Rights Extremism Terrorism and National Security offers an examination of the direct and indirect violence lone wolf terrorism and leaderless resistance that have characterized these radical wings from their inception By not only identifying the tactics and organizational structures often employed by these groups but also addressing future trends toward increased radicalization Environmental and Animal Rights Extremism Terrorism and National Security is an important resource for identifying anticipating and mitigating threats posed by such movements Describes the psychological social and organizational mechanisms responsible for the functioning of the extremist wings of the interconnected environmental and animal rights movements in the context of national security Identifies the main tactical and organizational ways these movements develop moving from hierarchical organization to network structures leaderless resistance and lone wolf activities Covers radical environmental and animal rights groups including Earth First Animal Liberation Front Earth Liberation Front Animal Rights Militia and the Sea Shepherd Conservation Society Looks to future trends in radicalization of these movements *The Age of Ecology* Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history

can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

*Ideology, Social Theory, and the Environment* William D. Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity

*Historical Dictionary of North American Environmentalism* Edward Robert Wells, Alan M. R. Gupta,Maria Anna Jankowska,Prasenjit Maiti,2007 **Eco-Imperialism Green Power, Black Death** Paul Driessen,2007-03 Federal Land, Western Anger R. McGregor Cawley,1993 Cawley objectively investigates the Sagebrush Rebellion looking at the driving force behind the movement the strategies used by the Rebels and the consequences of the controversy He also offers a provocative interpretation of events in federal land policy from the 1960s to the 1990s and establishes a framework for assessing future developments in federal land policy Includes an analysis of James Watt s beleaguered tenure as Reagan s Secretary of the Interior *Liberty Means Freedom for All* Steven H. Propp,2012-11-16 Thomas Anderson has just graduated from CSU Stentoria with his degree in Political Science Its an election year and as a young progressive in California who has been raised by equally progressive parents he is very much concerned with the political issues currently being discussed in the mass media A chance encounter with a fellow graduate named Kelly Kelso however shakes up his sett

led view of the world He is challenged to examine the rising number of alternatives to the two party system presented by third party movements such as the Libertarian Party and the Green Party and is forced to acknowledge that there is far more to politics than simply Democrat versus Republican and liberal versus conservative Thomas delves energetically into not only the growing Libertarian movement but the free market perspective of the Austrian School of economics as well as the rigid yet compelling view of Ayn Rand's philosophy of Objectivism His explorations grow wider now encompassing the Tea Party movement and the Christian Right tax resisters and gun rights advocates survivalists and militia members anarchists communists and Democratic Socialists as well as the Occupy Wall Street movement He debates the radical environmental views of animal welfare and animal rights advocates and challenges opponents of corporate globalism as well as deniers of global warming as he struggles to reformulate and articulate his own developing beliefs while coping with a sea of conflicting ideas and opposition But this abstract political theory is brought into sharp encounter with concrete political reality when Thomas hears a news report of an armed conflict with authorities taking place just outside of town involving someone with whom he has become emotionally involved

*The Environmental Pendulum* R. Allan Freeze, 2023-04-28 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion breeds reaction The Environmental Pendulum provides a thoughtful and evenhanded assessment of this conflict Tens of thousands of sites across the country are contaminated with toxic chemicals Environmentalists warn us that this legacy of carelessness is seriously affecting both human health and the ecological balance of nature They point out that even improved industrial practices will not eliminate future chemical releases to the environment Their demand for regulatory control has received wide public support and led to the passage of the Superfund legislation in 1980 Now after twenty years the value of the Superfund program is being challenged by corporate America which argues that excessive cleanup costs have the potential to bankrupt the nation R Allan Freeze outlines the difficulties associated with the management of hazardous waste and offers a balanced account of the controversy over the role of environmental contamination in human health Freeze clarifies what matters and what doesn't with respect to chemical contaminants in the environment arguing that environmental policies should be based on an accurate appraisal of the risks associated with these toxins He concludes the book with a brilliant summation of the good news and the bad news of environmental pollution describing what can and can't be done to bring the situation under control This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 2000 The pendulum of environmental policy swings from one extreme to the other depending on which camp is in power and who has the ear of the media Underkill is followed by overkill Concern breeds action disillusion
