Euphrates and Tigris, Mesopotamian Ecology and Destiny J. Rżóska, 2012-12-06 Scope and limitations of this book I am trying here to present the natural history of a land largely created and dominated by two great rivers the Euphrates and Tigris All rivers have two main functions quite different from lakes they transport water and eroded material sometimes over large distances The astute Greeks who penetrated here in the 4th century B C called the land Mesopotamia an apt name it is the only region in the Near East except Egypt having the benefit of large rivers Another name coined in antiquity was Fertile Crescent stretching from Egypt to present day Iraq Herodotus marvelled at the fertility of the soils the abundance of water and the magnificent cities of Mesopotamia Thus a further role of some great rivers is recognized as foci of human development The desire to collate this book arose from a similar motif as in the Nile book 1976 the intricate connection between man and rivers

Husain, 2021-03-05 In the early sixteenth century a series of military campaigns between the Mediterranean Sea and Persian Gulf brought the entirety of the Tigris and Euphrates rivers under Ottoman control This book offers a history of this rare political unification of the longest rivers in West Asia and its impact on the Ottoman state provincial society and the environment

Handbook of Plant Palaeoecology (First edition 2012) René T. J. Cappers, Reinder Neef, 2012-01-06 Plant palaeoecologists use data from plant fossils and plant microfossils to reconstruct ecosystems of the past This book deals with the study of microfossil plant material retrieved from archaeological excavations and cores dated to the Late Glacial and Holocene One of the main objectives of this book is to describe the processes that underlie the formation of the archaeobotanical archive and the ultimate composition of the archaeobotanical records being the data that are sampled and identified from this immense archive Our understanding of these processes benefits from a knowledge of plant ecology and traditional agricultural practices and food processing This handbook summarizes the basic ecological principles that relate to the reconstruction of former vegetations and of agricultural practices in particular We hope this book will help palaeobotanists environmental archaeologists and colleagues from related disciplines optimize inferences based on what we could term old style archaeobotany And we hope that our observations will serve as an eye opener and improve future research not only as it is practised in our laboratories but also as it is practised in the field
