Miller, 2003 Gaia Connections addresses several arenas of concern as humankind faces an escalating ecological and moral crisis in this new millennium Beginning with an overview of the history of philosophy and the importance of traditional thinking on modern day ethical reflection the book then looks at the development of theories of justice the problems of equity in global human relations the inability of existing economic systems to resolve our human and environmental dilemmas the unnatural connections now obtaining between genuine human need and the technological drift of science the new genetics and reproductive technologies and the nature of modern war The study concludes with some historical perspectives on American environmental history and the urgent need for change in our ecoethical social and value systems The principal focal areas of the original edition are continued the actual state of the global environment today the imperative for the development of sustainable economic and resource systems the movement within much of science toward an almost universal biological determinism and the need for a reaffirmation of an ethical value system which places the needs of people before the needs of property and profits The revised edition not only updates these data and the concerns of the original book but also visits a number of new issues the movement for environmental justice the connections between global poverty and the now almost universal allegiance to a new world market and free trade system the progress and the dilemmas of molecular biology and genetic engineering and the growing disarray within the global systems of political economy [The Oxford Handbook of Religion and Ecology](#) Roger S. CC BY NC ND 4 0 license Becoming Ecological James G. Kelly, 2006-02-02 Community psychology emphasizes an ecological approach to mental health by focusing on the individual in the environment and the influences that shape and change behavior. Becoming Ecological brings together the work of James G. Kelly, one of the founders of community psychology, and among the field's national leaders. The volume unites thirteen of Kelly's publications from 1968 to 2002, as well as four new essays on current issues in the field: the theory, research, practice, and education of community psychologists. Kelly introduces the work by offering connections between his personal experiences and the topics he chose to focus on throughout his long career. He begins each of the thirteen essays with commentary that sets the article in its original context so that the reader has a historical perspective on why certain ideas were salient at a particular time and how they are still timely today. Kelly concludes with a summing up section integrating the previously published articles with the four new essays. Throughout, he presents examples of how to plan and carry out research and practice in the community. The principles underlying the examples both enhance the relevance of the research and practice and increase the potential of community residents to use the findings for their own purposes. A compendium of classic statements of community psychology's philosophical and historical underpinnings, Becoming Ecological is a must read for scholars and practitioners of community psychology and for those in the fields of public health, social work, community development, education, and applied anthropology.

Naturalizing Heidegger David E. Storey, 2015-02-10 In Naturalizing Heidegger, David E. Storey proposes a new interpretation of Heidegger's importance for environmental philosophy, finding in the development of his thought from the early 1920s to his later work in the 1940s the groundwork for a naturalistic ontology of life. Primarily drawing on Heidegger's engagement with Nietzsche but also on his readings of Aristotle and the biologist Jakob von Uexküll, Storey focuses on his critique of the nihilism at the heart of modernity and his conception of the intentionality of organisms and their relation to their environments. From these ideas, a vision of nature emerges that recognizes the intrinsic value of all living things and their kinship with one another, and which anticipates later approaches in the philosophy of nature such as Hans Jonas's phenomenology of life and Evan Thompson's contemporary attempt to naturalize phenomenology.

Earthcare Carolyn Merchant, 2014-02-04 Written by one of the leading thinkers in environmentalism, Earthcare brings together Merchant's existing work on the topic of women and the environment, as well as updated and new essays. Earthcare looks at age-old historical associations of women with nature, beginning with Eve and continuing through to environmental activists of today, women's commitment to environmental conservation, and the problematic assumptions of women as caregivers and men as dominating nature.
