**Japanese Institutional Post-Keynesians Revisited** Hiroyasu Uemura,2023-03-09 This is the first book that systematically considers the academic achievements of Japanese institutionalist post Keynesian economists in the postwar period and argues that we can learn much from their intellectual heritage Those Japanese economists include the world renowned figures Shigeto Tsuru and Hirofumi Uzawa whose inheritance came from Keynes Marx and institutionalism In the era of globalization after the 1990s economic inequality and social divide have intensified all over the world In this situation the academic achievements of those economists in postwar Japan should be reconsidered for the aim of establishing a new political economy With this perspective the book looks at what we can learn from Japanese institutionalist post Keynesian economists In particular the essence of research work that each of them developed is identified focusing on the total image of the economy for contemporary capitalism Those economists benefited from the diverse legacies of Keynes Marx Kalecki and institutionalist economists such as Veblen and Galbraith When their research is examined systematically Japanese institutionalist post Keynesians are commonly characterized as those who developed their institutional analysis of contemporary capitalism with in depth theoretical and empirical studies with the aim of establishing their own political economy as the moral science of civil society These important features provide us with insightful implications for institutional economics in the 21st century

**An Economic Theory of Gender and Population Change** Wei-Bin Zhang,2025-01-10 This book proposes an economic theory of gender and population change by integrating neoclassical and new economic theories Modern economies are characterized by complicated dynamic interdependence between many variables such as population growth human capital accumulation wealth accumulation gender division of labor children caring environmental changes various types of conflicts wars and so on However modern dynamic economic theories deal with simplified

interdependence between a few variables Any genuine modeling of economic dynamics result in high dimensional nonlinear dynamics Nevertheless it is only in recent years that it is possible to examine the behavior of highly dimensional dynamics This partly explains why economic theory has been dominated by modeling dynamic economic systems with a few variables with linear linearized relations Since Malthus published his *An Essay on the Principle of Population* in 1798 economists have made great efforts to reveal the dynamic complexity of population change Modern economies have experienced unprecedented population dynamics No one in human history could even have rationally predicted the natural declination of the national population in modern times These failures in predicting family structural changes and life expectancy lead to many socioeconomic problems such as health costs in association with aging and pension systems that many societies fail to be prepared for This book contributes to the literature on macroeconomics based on microeconomics neoclassical growth theory new growth theory and family economics by integrating some important ideas in neoclassical growth theory and family economics This book extensively applies the ideas in the literature to deal with the complexity of population change

from having natural resources shifting away from the traditional focus on economic growth data to study the complex implications of these resources for human well being and sustainable development To this end Acar examines a panel of countries in terms of the effects of their natural resources on human development and genuine saving which is a sustainability indicator that takes into account the welfare of future generations by incorporating the changes in different kinds of capital Acar finds that the exportation of agricultural raw materials is associated with significant deterioration in human development while extractive resource exports such as energy and minerals have negative implications for genuine savings Next the book compares the development path of Norway before and after discovering oil contrasting it with Sweden s development The two countries which followed almost identical paths until the 1970s diverged significantly in terms of per capita income after Norway found oil

book addresses social issues related to family ageing and work that arise from these changes in Japan Korea Taiwan Hong Kong China Philippine and Sri Lanka These societies represent different levels of economic and social development but face similar challenges and their social interventions can be usefully compared This variety of subjects provides the reader with a more comprehensive understanding of the changes that have occurred the problems that have emerged and the strategies that have been adopted This volume provides insight into ways of addressing social issues in this rapidly changing part of the world
