era Based on the pioneering work of sociologist C K Yang 1911 1999 and his institutional diffusion theory the essays analyze and develop the theory as it applies to both public and private institutions The interrelationship of these institutions composes what Yang termed the Chinese system and affects nearly every aspect of life Yang examined the influence of external factors on each institution such as the influence of Westernization and Communism on family and the impact of industrialization on rural markets He also analyzed the impact of public opinion and past culture on institutions therein revealing the circular nature of diffusion Perhaps most significant are Yang s insights on the role of religion in Chinese society Despite the common perception that China had no religion he uncovers the influence of classical Confucianism as the basis for many ethical value systems and follows its diffusion into state and kinship systems as well as Taoism and Buddhism Writing in the early years of Communism Yang had little hard data with which to test his theories The contributors to this volume expand upon Yang s groundbreaking approach and apply the model of diffusion to a rapidly evolving contemporary China providing a window into an increasingly modern Chinese society and its institutions

Social Policy and Poverty in East Asia James Midgley, Kwong Leung Tang, 2009-09-11 This book looks at the role of social policy and particularly social security in addressing the ongoing challenge of poverty in East Asia despite the region s spectacular experience of economic growth in recent decades The East Asian miracle resulted over the last four decades in a transformation of the region s traditional agrarian economies and significant increases in standards of living for many ordinary people Even though it was given little attention poverty has remained an ongoing problem The problem became particularly evident however with the Asian financial crisis of 1997 when many low income and middle class workers became unemployed As a result of this crisis the need for effective social policies and social security programs were recognized The idea that economic growth would solve the problem of poverty was

increasingly challenged Even in China today where rapid growth has created new employment opportunities and the promise of prosperity for many the government has recognized that the problem of poverty cannot be addressed only through economic growth but that comprehensive social policies must be formulated and this includes the development of an effective security system
