Economic Theories in China, 1979-1988 Robert C. Hsu, 1991-10-25 An exploration of the substance and logic of the evolution of economic theories prevalent in China 1979 88 Sources of Chinese Economic Growth, 1978-1996 Chris Bramall, 2000-09-14 This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth accounting methodologies and market centred explanations which characterize so much of the literature on transition era China By adopting an approach which echoes the pioneering work of Chalmers Johnson Alice Amsden and Robert Wade on other East Asian Economies and which makes full use of the rich statistical materials that have become available since 1978 this book shows that Chinese growth was driven by a combination of state led industrial policy and the favourable infrastructural legacies of the Maoist era And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions it avoids over simplistic macroeconomic generalization Nevertheless even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in China than in other countries This book therefore goes beyond the development state approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the Cultural Revolution The policy implications are stark The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards conversely slavish reliance on foreign direct investment and trade are likely to limit the pace of growth But attempts to replicate China's success in Latin America sub Saharan Africa and South Asia will fail because their governments will not resist rent seeking by classes and interest groups Moreover as the state becomes weaker in the wake of the re emergence of a powerful capitalist class even Chinese growth may prove unsustainable Idealogy and Economic Reform Under Deng Xiaoping 1978-1993 Wei-Wei Zhang, 2013-02-01 First published in 1996 Is ideology still relevant in post Mao China Deng Xiaoping s wide ranging economic reforms have led to declarations that ideology in China is merely a cynical sham or already dead but a closer look at China seems to suggest a constant conflict of different ideologies associated with the profound transformation of the Chinese society since 1978 This study is an attempt to explore the interactions between major ideological currents and economic reforms Management in Transitional Economies Vincent Edwards, Gennadij Polonsky, Danijel Pucko, Malcolm Warner, Ying Zhu, 2005-02-25 Based on extensive research this comparative study examines the past present and future of management in the transitional economies of East and Central Europe Russia the People's Republic of China and Vietnam It discusses the nature of the transition process identifying different transition paths highlighting common features and outlining useful theoretical approaches Each chapter covers a wide range of aspects of management in the countries covered including details of the historical and cultural background the transition process and both external and internal factors and the macro and micro situation Its multidisciplinary approach

James Gregor, 2017-07-05 China has always been something of a mystery to Westerners For one generation Mao Zedong and his followers were simple agrarian reformers while for another they were the communist emperor and his blue ants In the 1970s some of the finest Sinologists believed there was much the United States could learn from Mao s Great Proletarian Cultural Revolution with regard to bureaucracy criminal justice health care and mass education By the 1980s those same theo rists asserted that Maoism was nothing more than a feudal fascism and had abso lutely nothing positive to teach Marxism China and Development provides a plausible explanation of these developments that have had such a powerful effect on the people of China for the past half century The author describes and explains the strange collection of beliefs that made up the Marxism of Mao Zedong He seeks to understand why the communist leader ship of China like that of the USSR tried to spur economic growth by abandoning the market modalities common to developed economies A James Gregor's conceptual framework is both original and makes more comprehensible the history of Marxism and the history of China Among the major topics he covers are imperi alism political democracy economics and alternatives to Maoism and Marxism for China While it is unlikely that our understanding of so complex a series of events as modern Chinese history will soon become less controversial Marxism China and Development's clear concise explanations will clarify some perplexing areas and make the new turns in Chinese political economy more understandable This is a monumental effort at theory construction that will be of interest to political scien tists economists sociologists and Sinologists The Advance of the State in Contemporary China Sarah Eaton, 2016 Charts the advance of the state in contemporary China through an analysis of state market relations in the <u>Under New Ownership</u> Shahid Yusuf, Kaoru Nabeshima, Dwight Heald Perkins, 2006 Although China's centrally reform era planned economy is a little more than a shadow of its former self the closely inter linked reforms of the enterprise and banking sectors are still incomplete The relative size of the state owned enterprise sector has been much reduced however the sector remains the dominant borrower from the banking system and is responsible for the majority of bank non performing assets Thus in the interests of financial stability it is crucial to implement the remaining reform agenda The accession to the WTO has also made it more urgent for China s most dynamic state owned en **Leadership of Chinese Private Enterprises** Anne S. Populating No Man's Land János Mátyás Kovács,2018-09-15 This edited volume opening the new series Revisiting Communism Collectivist Economic Thought in Historical Perspective focuses on the concepts of ownership the cornerstone of political economy in Soviet type societies The authors main objective is to contribute to the still unwritten chapter on collectivism in the history books of modern economic thought They trace the lengthy evolution of economic ideas of property reform under communism leading from the doctrine of blanket nationalization to projects of moderate privatization in eight countries of Eastern Europe and China The comparative analysis sheds light upon the tireless attempts of reform minded economists in communist countries to populate the no man s land of social property with quasi private economic actors such as bodies of workers self management and managers of state owned companies For a long time these were expected to crowd out the communist nomenklatura from its actual ownership position without challenging the primacy of collective property rights The fact that even the most radical reformers came to the conclusion that such surrogate owners would not be able to break the power of the ruling elite only on the eve of the 1989 revolutions demonstrates the immense strength of collectivist ideas The authors coin the term trap of collectivism to warn those demanding nationalization or other forms of non private ownership today it is rather easy even with the best intentions to walk into this trap but it may take long decades
