Discovering the Christian Mind Douglas Vickers, 2011-06-24 The relation between Christianity and the claims of reason has been at times sharp and conflicting and at times symbiotic Noted scholars in the church and in the secular academy have asked what Christianity has to do with culture and what the Christian mind has to say or should be saying by way of critique in the marketplace of ideas In *Discovering the Christian Mind* Douglas Vickers argues insightfully that prior to the question of what the Christian mind should be doing or saying is that of what the Christian mind is Vickers shows that the true identity of the Christian mind derives from the Holy Spirit's conveyance to the soul of the grace of regeneration The conclusion that regeneration is prior to knowing and that those know truly who know God truly challenges thought and opinion

Nazism, Liberalism, and Christianity Kenneth C. Barnes, 2021-11-21 The Great Depression devastated the economies of both Germany and Great Britain Yet the middle classes in the two countries responded in vastly different ways German Protestants perceiving a choice among a Bolshevik style revolution the chaos and decadence of Weimar liberalism and Nazi authoritarianism voted Hitler into power and then acquiesced in the resulting dictatorship In Britain Labour and Tory politicians moved gingerly together to form a National Government that muddled through the Depression with piecemeal reform In this troubling book about troubled times Kenneth Barnes looks into the question of how theologians and church leaders contributed to a cultural matrix that predisposed Protestants in these two countries to very different political

alternatives Holding fast to the liberal social gospel British churchmen diagnosed the problems of the 1920s and the Depression as solvable and called for genuine reforms many of which foreshadowed the coming welfare state German leaders in contrast were terrified by the socioeconomic and political problems of the Weimar era and offered no social message or solution Despairingly they referred the problems to secular politicians and after 1933 beat the drum for obedience to the Nazi state Based on extensive research in European archives especially the rich papers of the interwar ecumenical movement housed at the World Council of Churches in Geneva this book examines key intellectual figures such as Karl Barth Paul Tillich Dietrich Bonhoeffer and Archbishop William Temple as well as many lesser known church officials and theologians Barnes brings to life the intellectual struggles and dilemmas of the interwar period to help explain why good people could for moral and religious reasons choose opposing courses of political action
