Bureau of the Census,1975 Money, Income and Time Alvaro Cencini,2013-11-07 In Money Income and Time Alvaro Cencini examines how money has been alternatively defined as a commodity and as the general equivalent of all commodities to be subsequently identified with the concept of num raire and finally reduced to the actual notion of credit To better clarify the terms of the problem the writer analyses it through the main theories of money which have been developed since the works of the classical economist The book does not take the form of a history of economic doctrines however since its aim is at the same time less ambitious and more precise that is defining the true nature of money through a critical and synthetic appraisal of its various analyses **Money Income in 1974 of Families and Persons in the United States** United States. that money illusion seems to be a ubiquitous phenomenon affecting various areas such as financial markets housing markets labor markets consumption saving decisions and even development at the aggregate level induced by coordination issues Furthermore in light of the educational efforts of central banks and other institutions it is worth considering whether solid economic training would provide guidance for the public regarding their decision making and thereby alleviate the effects of money illusion The emerging field of experimental economics provides a unique opportunity for us to verify the presence of money illusion Specifically attention is devoted to the experimental investigation of reduction in the direct and indirect effects of money illusion with respect to the level of economic literacy acquired through economic education Economic Literacy and Money Illusion will be of interest to the general audience and to those who are interested in behavioral economics economics education and experimental economics as well as to policy makers and institutions Last but not least it will help develop students interest in alternative economic theories NB The research and writing of this book was made possible with the support of the University of Economics Prague Faculty of Economics Department of Economics
