Economic Trends and Their Implications for the United States ,1969 **Development Economics** Gérard Roland,2016-05-23 Gerard Roland s new text Development Economics is the first undergraduate text to recognize the role of institutions in understanding development and growth Through a series of chapters devoted to specific sets of institutions Roland examines the effects of institutions on growth property rights market development and the delivery of public goods and services and focuses With the most comprehensive and up to date treatment of institutions on development Roland explores the important questions of why some countries develop faster than others and why some fail while others are successful Contributions of Africa's Indigenous Knowledge to the Wave of Digital Technology: Decolonial Perspectives

Niyitunga, Eric Blanco,2024-04-09 Africa s contributions to global technological advancements are often overlooked with many scholars claiming that the continent has yet to contribute significantly to digital technology This misconception stems from a need for more understanding and recognition of Africa s indigenous knowledge and its role in shaping the modern world The education curriculum inherited from colonialism must differentiate Africa s values and culture from Western ideals leading to a devaluation of Africa s mineral wealth in technological advancements Additionally the impact of historical events such as the Atlantic slave trade and colonialism on Africa s indigenous knowledge remains largely unexplored further contributing to the misunderstanding of Africa s technological contributions Contributions of Africa s Indigenous Knowledge to the Wave of Digital Technology Decolonial Perspectives offers a comprehensive exploration of Africa s indigenous knowledge and its crucial role in the Fourth Industrial Revolution 4IR By taking a decolonial perspective and examining the literature on African Studies the book aims to shed light on Africa s significant contributions to digital technology Through a qualitative research design and an exploratory approach the book will collect and analyze data from secondary sources to showcase Africa s rich technological advancements and history of innovations *Non-State Actors in Education in the*

Global South Prachi Srivastava,Geoffrey Walford,2019-10-23 Fuelled by social equity concerns there have been vigorous debates on the appropriateness of certain non state actors particularly those with commercial and entrepreneurial motives to meet universal education goals There are further questions on the relative effectiveness of government and private schooling in delivering good learning outcomes for all Within this debate several empirical questions abound Do students from poorer backgrounds achieve as well in private schools as their advantaged peers What are the relative out of pocket costs of accessing private schooling compared to government schooling Is fee paying non state provision affordable to the poorest households What is the nature of the education market at different levels What are the relationships between different non state actors and the state and how should they conduct themselves The chapters in this volume present new empirical

evidence and conduct critical analysis on some of these questions This book was originally published as a special issue of the Oxford Review of Education

(Re)Constructing Memory: Education, Identity, and Conflict Michelle J. Bellino,James H. Williams,2017-02-08 How do schools protect young people and call on the youngest citizens to respond to violent conflict and division operating outside and sometimes within school walls What kinds of curricular representations of conflict contribute to the construction of national identity and what kinds of encounters challenge presumed boundaries between us and them Through contemporary and historical case studies drawn from Cambodia Egypt Northern Ireland Peru and Rwanda among others this collection explores how societies experiencing armed conflict and its aftermath imagine education as a space for forging collective identity peace and stability and national citizenship In some contexts the erasure of conflict and the homogenization of difference are central to shaping national identities and attitudes In other cases collective memory of conflict functions as a central organizing frame through which citizenship and national identity are re constructed with embedded messages about who belongs and how social belonging is achieved The essays in this volume illuminate varied and complex inter relationships between education conflict and national identity while accounting for ways in which policymakers teachers youth and community members replicate resist and transform conflict through everyday interactions in educational spaces
