Clarke,2012-11-30 A superbly ingenious classic of space survival from the author of 2001 A Space Odyssey one of science fiction s most influential grandmasters Daily Express Expanding the Moon s population hinges on building a thriving tourist industry But when a prototype tourist craft called the Selene encounters a moonquake the ship plummets under a vast body of liquid fine moondust called the Sea of Thirst While time runs out for the passengers and crew rescuers find their resources stretched to the limit by the unpredictable conditions of the lunar environment Nominated for the Hugo Award in 1963 this brilliantly imagined story of human ingenuity and survival is a tour de force of psychological suspense and sustained dramatic tension sure to appeal to fans of Andy Weir s The Martian The best book yet about man s most dramatic journey the most exciting science fiction novel for years Evening Standard Expertly told and cruelly exciting to the end The Sunday Times Extremely good with some superbly ingenious and exciting new twists Daily Express A Fall of Moondust by Arthur C. Clarke British Columbia Teachers' Federation,British Columbia Teachers' Federation. Lesson Aids Service,197? A Fall of Moondust Arthur Charles Clarke,1967 This story is about a ship that sank deep in the dust of one of the seas of the Moon and how passengers and crew were rescued just in time A fall of moondust Arthur C. Clarke,1971 Nature & Science on the Pacific Coast ,1915 **The Hammer of God** Arthur C. Clarke,1994-10-01 Entertaining Arthur Clarke handles both ideas and characters with deftness and wit in short the outstanding living science fiction writer is romping Chicago Sun Times In the year 2110 technology has cured most of our worries But even as humankind enters a new golden age an amateur astronomer points his telescope at just the right corner of the night sky and sees disaster hurtling toward Earth a chunk of rock that could annihilate civilization While a few fanatics welcome the apocalyptic destruction as a sign from God the greatest scientific minds of Earth desperately search for a way to avoid the inevitable On board the starship Goliath Captain Robert Singh and his crew must race against time to redirect the meteor from its deadly collision course Suddenly they find themselves on the most important mission in human history a mission whose success may require the ultimate sacrifice Praise for The Hammer of God Clarke is still at the top of his game The Detroit News As good as anything he has written For a hard science fiction treat I suspect The Hammer of God won t be topped Star Tribune Minneapolis Classic Clarke A good story The Denver Post **Rama Revealed** Arthur C. Clarke,1995-01-01 On its mysterious voyage through interstellar space a massive alien starship carries its human passengers to the end of a generations long odyssey But the great experiment designed by the Ramans has failed and Rama III has become a battleground Fleeing a tyrant a band of humans ventures into the nether regions of the ship where they encounter an emerald doomed lair ruled by the fabulously advanced octospiders As the octospiders lure the humans deeper into their domain the humans must decide whether the creatures are their allies of

enemies All the while Rama III continues its inexplorable journey towards the node where the climax of their voyage awaits the stunning revelation of the true identity of the beings behind this glittering trek across the cosmos A Companion to Science Fiction David Seed,2008-04-15 A Companion to Science Fiction assembles essays by an international range of scholars which discuss the contexts themes and methods used by science fiction writers This Companion conveys the scale and variety of science fiction Shows how science fiction has been used as a means of debating cultural issues Essays by an international range of scholars discuss the contexts themes and methods used by science fiction writers Addresses general topics such as the history and origins of the genre its engagement with science and gender and national variations of science fiction around the English speaking world Maps out connections between science fiction television the cinema virtual reality technology and other aspects of the culture Includes a section focusing on major figures such as H G Wells Arthur C Clarke and Ursula Le Guin Offers close readings of particular novels from Mary Shelley's Frankenstein to Margaret Atwood's The Handmaid's Tale Science Fiction and Fantasy Literature, Vol 1 R. H. G. Armytage,2021-12-24 First published in 1968 Yesterday's Tomorrows elucidates on the favourite occupation of man forecasting the future By man's predictions he mirrors his own wish fulfilments displacements projections denials evasions and withdrawals These predications can take the form of countries of the imagination mirror worlds like Rabelais Ever Ever lands or the Erewhon of Butler Alternatively they may spring from panic reflecting fear rather than hope often manifesting themselves in our technological age as reports of flying saucers or invasions from another planet In either form they provide philosophers scientists doctors and sociologists with material for evaluating man's future needs offering both criticism of our present society plans for our future and release from tension and disequilibrium Professor Armytage shows in this book how such visions can and do refresh minds for renewed grappling with the present by arming them with ideas for man's future needs He indicates that out of an apparent welter of futuristic fantasies a constructive debate about tomorrow is emerging providing us with operational models of what tomorrow could be This book will hold special interest for students of philosophy and of English literature **The Light of Other Days** Arthur C. Clarke,Stephen Baxter,2010-01-11 Quantum wormhole technology brings about the end of human privacy in a novel fizzing with ideas by two of science fiction's most acclaimed authors Kirkus Reviews From Arthur C Clarke the brilliant mind that brought us 2001 A Space Odyssey and Stephen Baxter the Philip K Dick Award winning author of The Time Ships comes a novel of a day not so

far in the future when the barriers of time and distance have suddenly turned to glass When a brilliant driven industrialist harnesses cutting edge physics to enable people everywhere at trivial cost to see one another at all times around every corner through every wall the result is the sudden and complete abolition of human privacy forever Then the same technology proves able to look backward in time as well The Light of Other Days is a story that will change your view of what it is to be human

All the Wonder that Would Be Stephen Webb,2017-05-03 It has been argued that science fiction SF gives a kind of weather forecast not the telling of a fortune but rather the rough feeling of what the future might be like The intention in this book is to consider some of these bygone forecasts made by SF and to use this as a prism through which to view current developments in science and technology In each of the ten main chapters dealing in turn with antigravity space travel aliens time travel the nature of reality invisibility robots means of transportation augmentation of the human body and last but not least mad scientists common assumptions once made by the SF community about how the future would turn out are compared with our modern understanding of various scientific phenomena and in some cases with the industrial scaling of computational and technological breakthroughs A further intention is to explain how the predictions and expectations of SF were rooted in the scientific orthodoxy of their day and use this to explore how our scientific understanding of various topics has developed over time as well as to demonstrate how the ideas popularized in SF subsequently influenced working scientists Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester Stephen Webb has worked in a variety of universities in the UK He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as well as several popular science books
