Carpentier's Baroque Fiction Steve Wakefield,2004 Carpentier was one of the first novelists to introduce a version of magical realism and the neo baroque into Latin American fiction This study focuses on one of the first novelists to introduce a version of magical realism and the neo baroque into Latin American fiction Original research colours eyewitness accounts of Alejo Carpentier s travels through Spain before and during the Spanish Civil War and the inspiration that he drew from the Baroque architecture he encountered there The origins of Carpentier s uniquely baroque style are found in his endeavour to create a period ambience in his historical fictions through descriptions of visual arts and architectural settings and parodies of the literary style of Spanish Golden Age writers Medusa s gaze is used as a metaphor for the petrifying power of the Baroque as a weapon of European dominance By wielding the same weapon in an act of postcolonial defiance Carpentier enabled a reassertion of Latin American culture and laid the foundations for the 1960s Boom in the Latin American novel

STEVE WAKEFIELD is Visiting Research Fellow at the University of New South Wales Australia Fillers Brigitte Pakendorf, Françoise Rose, 2025-07-04 Fillers are non silent linguistic devices used in disfluencies to gain time while searching for words In addition they are frequently used intentionally to avoid words for reasons of politeness conspirational motivations or rhetorical purposes Two syntactically distinct types of conventionalized fillers can be distinguished placeholders and hesitatives also called hesitators Placeholders are referential and morphosyntactically integrated while hesitatives are neither Strikingly even though fillers are cross linguistically widespread dedicated studies of such items in particular languages are still largely lacking This collective volume comprises in depth descriptions of conventionalized fillers in a substantial variety of languages from Eurasia Papunesia Australia and the Americas hoping to stimulate typological research on fillers both hesitatives and placeholders The book aims to contribute to a better visibility of the topic among general linguists to make data and analyses accessible that will be useful for further typological studies on the topic and to provide models for descriptive linguists The introductory chapter discusses issues emerging from the previous literature and offers a new typology of fillers It also highlights the major findings of the eleven remaining chapters Each of these contains a detailed and typologically informed analysis of fillers in one or several underdescribed languages based on corpora of natural

speech and focusing on lexical fillers rather than on phenomena below the word level phonetic lengthening truncation or above the word level such as idioms and discourse markers like you know or rhetorical questions like what s the word for that The chapters cover a large amount of diversity both in terms of languages and with respect to the type of filler They focus on i the criteria for identification of the various types of fillers and the terminology used keeping in mind that the domain is still largely under construction ii a detailed analysis in terms of morphosyntactic distribution and if possible iii frequency in speech and iv some reflection on the diachronic development of these disfluency markers **Gene Vincent**
