### **Street Naming and the Politics of Greek-Cypriot**

**Identity** Stella Theodorou,2024-04-23 This book is the first to explore street names and street naming in the formation of a Greek Cypriot identity in the cityscape of Nicosia between 1878 and 1975 Rather than treating toponymy as a direct linguistic act of spatial orientation the book approaches street naming as a contested practice involving those shared symbols and representations used to depict official history and collective identity as part of a political process It considers how street names are part of the symbolic politics of space and how authorities transformed the streets of Nicosia into arenas of struggle for the control of symbolic and material space It documents historical efforts over the course of a century to impose a geography of forgetting to buttress national identity and to cast out the other from space both literally and symbolically so as to achieve territorial dominance and political legitimacy The book is another step towards the development of a global perspective on the critical study of street naming thereby refining and expanding our knowledge of the political dynamics involved in the process In their commemorative capacity street names belong to the politics of public memory and identity
