## **Families That Work:**

**Families That Work** Janet C. Gornick, Marcia K. Meyers, 2005-05-12 Parents around the world grapple with the common challenge of balancing work and child care. Despite common problems, the industrialized nations have developed dramatically different social and labor market policies, policies that vary widely in the level of support they provide for parents and the extent to which they encourage an equal division of labor between parents as they balance work and care. In *Families That Work*, Janet Gornick and Marcia Meyers take a close look at the work family policies in the United States and abroad and call for a new and expanded role for the U.S. government in order to bring this country up to the standards taken for granted in many other Western nations. In many countries in Europe and in Canada, family leave policies grant parents paid time off to care for their young children, and labor market regulations go a long way toward ensuring that work does not overwhelm family obligations. In addition, early childhood education and care programs guarantee access to high quality care for their children. In most of these countries, policies encourage gender equality by strengthening mothers' ties to employment and encouraging fathers to spend more time caregiving at home. In sharp contrast, Gornick and Meyers show how in the United States, an economy with high labor force participation among both fathers and mothers, parents are left to craft private solutions to the society-wide dilemma of who will care for the children. Parents overwhelmingly, mothers must loosen their ties to the workplace to care for their children; workers are forced to negotiate with their employers, often unsuccessfully, for family leave and reduced work schedules; and parents must purchase care of dubious quality at high prices from consumer markets. By leaving child care solutions up to hard-pressed working parents, these private solutions exact a high price in terms of gender inequality in the workplace and at home, family stress, and economic insecurity, and not least, child well-being. Gornick and Meyers show that it is possible, based on the experiences of other countries, to enhance child well-being and to increase gender equality by promoting more extensive and egalitarian family leave, work time, and child care policies. *Families That Work* demonstrates convincingly that the United States has much to learn from policies in Europe and in Canada, and that the often-repeated claim that the United States is simply too different to draw lessons from other countries is based largely on misperceptions about policies in other countries and about the possibility of policy expansion in the United States.

individual benefits within the package as well as for life insurance As is clear less than half of all employed workers report having a benefits package consisting of health insurance paid sick leave and a retirement program Married males living with their wives with or without children have the highest eligibility rate for this package but even they are almost as likely not to have coverage as to have it In addition to their other hardships the large majority of women raising children alone lack coverage for these basic benefits Only slightly more than a third have these three benefits a smaller percentage than for workers in all other household types Of course their low level of coverage represents a particularly acute problem because they bear

Carmody,1991 *Work and Family Commitments of Low-Income and Impoverished Women* Judith Hennessy,2015-03-18 Conflict between work and family life is an all too familiar experience for many Americans The difficult choices facing women who combine paid work with childcare are the subject of a deluge of books and articles in addition to an ongoing public debate about how women and men should balance their work and family commitments Although we know a great deal about the social and cultural environment fueling these contradictions among middle class and upper middle class women we know little about the forces that influence poor and low income women Work and Family Commitments of Low Income and Impoverished Women addresses this omission and gives voice to women in poverty as it traces the moral and cultural structures that help shape the meaning and value of paid work and motherhood among a group of mothers who rely on welfare or a combination of low wage work and welfare to provide and care for their families This portrayal of poor women s lives rarely enters the work life debate over women s choices generally characterized as between mothers who have to work versus those who choose to Judith Hennessy puts low income women front and center to shed light on less explored aspects of the moral and cultural foundations of contemporary

work and family conflict from interviews and survey data of a group of low income and poor mothers on and off welfare Hennessey explores the paradox in American society where combining paid work with caring for children continues to generate considerable ambivalence and often guilt on the part of married middle class mothers for devoting too much time to paid work and supposedly neglecting their children While poor and working class mothers who might otherwise rely on welfare are relegated to working at low wage jobs outside the home in fulfillment of their family responsibilities *Family Leave Policy: The Political Economy of Work and Family in America* Steven K.
