Women's Employment in a Comparative Perspective Liset Van Dijk, Tanja Van Der Lippe, These comparative studies by internationally known scholars in the United States Hungary Germany and the Netherlands provide a cross national examination of substantially differing circumstances in hours earnings job level childcare availability parental leave and the like of women s employment The book s dual focus on micro and macro approaches clarifies the extent to which these variances can be ascribed to differences in the institutional context of employment or to the individual characteristics of female employees It thereby provides a valuable contribution both to gender studies and to studies on the sociology of work Women s employment changed dramatically during the second half of the twentieth century Countries in the northern hemisphere have faced similar trends in labor and employment yet there are still many contrasts between them when it comes to women s work In this volume women s employment is studied in different institutional structural and social settings with the intention of exploring the causes of the differences and similarities in women s employment in different countries and at different times Three perspectives are used the macro approach which provides a thorough and focused understanding of the influence of the institutional context on women s work the micro approach which gives insight into the employment behavior of individual women who live in the same social or

institutional context and the macro micro approach which makes clear the relative importance to women s work of both individual characteristics and institutional context While a good deal of information is available on women s employment a cross national comparison over time has been lacking This book fills that all important niche Women s Employment in a Comparative Perspective thus has a special relevance for economists as well as sociologists and social work specialists Tanja Van der Lippe is assistant professor of sociology at the Research School ICS of Utrecht University the Netherlands Liset Van Dijk is senior researcher at the Netherlands Institute for Health Services Research Nivel [Life Course, Work, and Labour in Global History](#) Josef Ehmer,Carola Lentz,2023-09-18 This multidisciplinary volume offers unique perspectives across the globe and throughout the centuries on the complexity of the nexus between work and the life course For industrialized regions from Germany and Western Europe to China and Japan it questions the widespread notion of an overall growing working life course instability since the 1970s For unindustrialized or industrializing regions from West Africa to state socialist East Central Europe as well as for transnational and transcontinental labour migrations it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work For early modern Europe India and China and up to twentieth century state socialism and to current welfare states it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work related decision making With all chapters based on original research the volume reflects a close cooperation between historians anthropologists and sociologists Its multidisciplinary approach finds expression in its methodological plurality reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation This mix allows to grasp the interaction between societal change and individual agency *The Pre- and Proto-historic Finns, Both Eastern and Western* John Abercromby,1898 **Eastern European Immigrant Families** Mihaela Robila,2013-05-13 Immigration from Eastern Europe to the United States has grown significantly in the last few decades While Asian and Latin American immigrations have been central to the discourse of migration to the US the rapid growth of Eastern European immigrants has received insufficient attention Robila fills this gap by presenting key issues related to immigration from Eastern Europe such as child rearing beliefs and practices cultural beliefs second generational conflicts as well as the challenges faced by Eastern European immigrants as they immigrate around the world *Routledge International Encyclopedia of Women* Cheris Kramarae,Dale Spender,2004-04-16 For a full list of entries and contributors sample entries and more visit the Routledge International Encyclopedia of Women website Featuring comprehensive global coverage of women s issues and concerns from violence and sexuality to feminist theory the Routledge International Encyclopedia of Women brings the field into the new millennium In over 900 signed A Z entries from US and Europe Asia the Americas Oceania and the Middle East the women who pioneered the field from its inception collaborate with the new scholars who are shaping the future of women s studies to create the new standard work for anyone who needs information on women related subjects [Families in](#)

**Beyond Welfare State Models** Pauli Kettunen, Klaus Petersen, 2011 Welfare state models have for decades been the gold standard of welfare state research Beyond Welfare State Models escapes the straightjacket of conventional welfare state models and challenges the existing literature in two ways

Firstly the contributors argue that the standard typologies have omitted important aspects of welfare state development Secondly the work develops and underlines the importance of a more fluid transnational conceptualisation As this book shows welfare states are not created in national isolation but are heavily influenced by transnational economic political and cultural interdependencies The authors illustrate these important points of criticism with their studies on the transnational history of social policy religion and the welfare state Nordic cooperation within the fields of social policy and marriage law and the transnational contexts of national family policies This fascinating work contributes to the understanding of the current changes of welfare states by discussing the relationship between globalized capitalism and social political regulations and by arguing that transnational transformations importantly take place within and between nation states *The Oxford Handbook of Family Policy Over the Life Course* Mary Daly,Birgit Pfau-Effinger,Neil Gilbert,Douglas J.
