Families That Abuse Diagnosis And Therapy:

Families that Abuse Stefano Cirillo, Paola Di Blasio, 1992 This volume presents a model for family therapy as an alternative to the institutionalization of parents who abuse their children *Counseling Addicted Families* Gerald A. Juhnke, W. Bryce Hagedorn, 2013-08-16 Although one person's addiction almost inevitably affects his or her family members a surprising number of treatment models appear to operate under the assumption that an individual's addiction occurs in a vacuum By not paying sufficient attention to preexisting family dynamics whether dysfunctional supportive or somewhere in between counselors run the risk of not fully understanding the roots of an individual's addictions or the obstacles to his recovery as a result counselors may undermine their own treatment efforts both by neglecting any underlying family problems and by failing to capitalize upon a family's potential assistance in an intervention with the addicted individual In *Counseling Addicted Families* Gerald A. Juhnke and William Bryce Hagedorn address this problem head on Recognizing that even those treatment providers who understand the importance of the familial context of addiction are often stymied by the variety of family treatment theories and their often imperfect fit for cases of addiction Juhnke and Hagedorn provide a truly integrated model for assessment and treatment Based upon the authors combined 23 years of experience in clinical and treatment supervision the Integrated Family Addictions Model consists of six progressive treatment tiers which organize the relevant family treatment theories into a graduated and coherent sequence beginning with the briefest and least costly forms of therapy If one of the lower tiers allows clients to reach their treatment goals the patient and therapist need not waste time and resources following the full continuum If however their needs are still unmet they can progress in a logical fashion to more advanced and intensive forms of therapy The book is divided into three broad topic areas designed to provide counselors and graduate students with essential information both about addictions and about the practical applications of various treatment theories Part One discusses the prevalence of addictions their negative impact upon families and the primary existing addiction treatment models including their limitations and benefits Part Two outlines methods of assessment for individual cases and Part Three presents the Integrated Family Addictions Model in detail Along the way the authors deal with specific interventions for families dealing with violence and dual diagnosis The book concludes with an epilogue on professional training which includes an overview of the major professional addiction and marriage and family counseling organizations and the ways in which they might benefit individual practices and practitioners *Counseling Military Families* Lynn K. Hall, 2016-04-28 How does the military really work What issues are constants for military families and what special stresses do they face *Counseling Military Families* provides the best available overview of military life including demographic information and examples of military family issues Chapters focus on vital issues such as the unique circumstances of reservists career service personnel spouses and children and present treatment models and targeted interventions tailored for use with military families *Counseling Military Families* provides clinicians with the tools they need

Allen

MD, 2010-07-01 The book examines various scientific economic and cultural forces that have affected the mental health field s viewpoint and that of society in general regarding the genesis of some behavioral disorders and how dysfunctional family dynamics play an often overlooked role Millions of Americans have psychological issues or are affected by those of their family members ranging from anxiety and bipolar disorder to mood and personality disorders The growth of Big Pharma combined with an increasing desire of managed care providers to find simple and quick fixes has resulted in an often myopic focus on biological causes of dysfunctional symptoms There is plenty of evidence to indicate that this propensity to only prescribe pills is often deeply misguided however This book examines the role of dysfunctional family interactions in the genesis and maintenance of certain behavioral problems The author presents a case for regaining a balance in terms of the biological psychological and family system factors in psychiatric disorders and suggests a way to accomplish this

Families Affected by Addiction Gallus Bischof, Richard Velleman, Jim Orford, Abhijit Nadkarni, Marcela Tiburcio, 2025-05-06. This Open Access book sheds new light on the wide range of Affected Family Members' experiences. At a conservative estimate, there are at least 100 million adults across the globe who are affected by their relatives' addiction problems. These Affected Family Members (AFMs) experience multiple stresses, coping dilemmas, and a lack of information and support, and are at heightened risk for ill health. The results are very costly, both from the personal and from the public services point of view. The volume elaborates on the barriers to providing effective help, including political neglect, underrepresentation in both policy and service delivery models, the lack of involvement and encouragement from health and social care professionals, the stigmatisation and bias as barriers to care, and the range of evidence-based interventions. It also explores the similarities and differences of all of these areas depending on the type of addiction problem that the family is affected by: alcohol, illicit drugs, gambling, etc. While covering the more commonly reported work in high-income countries, the contributions put strong emphasis on the experience of AFMs in low and middle-income countries. Given its truly global approach, the book will be a key resource for practitioners, policymakers, and researchers alike.

Emdr for the Next Generation-Healing Children and Families 2nd Ed Joanne Morris-Smith, Michel Silvestre, 2014-06-10. This book is about developing an integrative model of doing EMDR psychotherapy in a multi-faceted way in order to get close to children's

reality and to help them and their families heal. It explains how emphasis has to be placed on several fundamental elements including attachment issues, family dynamics, developmental psychology, neurobiology, and psycho-traumatology, which meet and are enlightening. The authors point out the necessity of trusting the process, believing in resources outside of them, developing attuned relationships with the children and their families, looking at life through the glass half full. Bob Tinker has endorsed the book and said that he is impressed with the way these two clinicians interweave knowledge of research, developmental psychology, family therapy, neuroscience, and clinical cases into a tapestry of understanding that illuminates the field of EMDR therapy.
