Agriculture Ronald C. Wimberley, Craig K. Harris, Joseph J. Molnar, Terry J. Tomazic, 2002-08-30 In a vast society where environmentally conscious nonfarming voters and consumers have grown to greatly outnumber those directly engaged in agriculture what happens in agriculture becomes increasingly subject to control by the general society as policies and laws cater to constituents and consumers This book provides an overview of how Americans perceive and value farmers and examines public opinion with regard to a number of agricultural issues Based on analysis of national survey data the authors offer an empirically based discussion and interpretation of those views and perceptions that help to shape policy and social sustainability This unique collection illustrates that in addition to its natural biological and economic risks agriculture has social risks that reverberate through all levels of society As the general population grows and the number of farms and farmers diminishes the weight of public opinion becomes more important in the policy arena of society as well as in the market demands for food and fiber grown in safe and favorable environmental conditions Setting the stage with a consideration of the larger society's interests in agricultural issues and of social and agricultural interdependence the contributors cover a range of topics and issues affecting agriculture at the end of the 20th century Chapters examine public perceptions of government's role in farming support for an environmentally friendly agricultural system views on pesticides and chemicals in foods consumer attitudes on food safety threats to clean drinking water concerns over farm animal welfare and the basic agrarian ethic of American society The book concludes with a look to the future of the social risks of agriculture in the 21st century *All in the Family* Patricia Strach, 2007 All in the Family demonstrates how policymakers employ family across a host of policy areas to achieve their non family goals and the consequences this has for policy stability over time

Democracy by Other Means John Buell, 1995 Family Agriculture David G. Francis, 2023-07-26 Originally published in 1994 this book examines the importance of family agricultural systems in both the developed and the developing worlds Throughout the world and throughout history the family unit has been at the heart of agricultural systems Working together families not only furnish their own needs but form the basis for society itself they provide the labour population resources and the market to maintain much of the world's economic and social development But the global race for financial prosperity with its large scale intensive farming techniques is increasingly undermining the family's role in food production and social cohesion This book explores both traditional and modern farming techniques and looks at their different consequences for national agricultural resources and for rural societies Finally it suggests ways in which technology can be harnessed to meet the needs of the family rather than undermine it in order to achieve a viable and sustainable agriculture for the future
