Handbook of Marriage and the Family Marvin B. Sussman, Suzanne K. Steinmetz, Gary W. Peterson, 2013-06-29 To know where we are going as scholars educators and practitioners in the field of marriage and family life we first need to know where we have been A perusal of early texts on marriage and family life provides some thought provoking insights into the accuracy of the saying what goes around comes around It is interesting to note who has been considered to be in a position to provide information on marriage and family life Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p *Resources in Education* ,2001-10

topic based reviews **Knowledge and the Family Business** Manlio Del Giudice, Maria Rosaria Della Peruta, Elias G. Carayannis, 2010-12-06 Family businesses the predominant form of business organization around the world can make numerous critical contributions to the economy and family well being in both financial and qualitative terms But dysfunctional family businesses can be difficult to manage painful experiences at best and they can destroy family wealth and personal relationships This book explores the dynamics of family business management in the context of constantly changing market conditions and the role that knowledge management plays in strategic planning and adaptation Integrating the literature from family business entrepreneurship industrial psychology and knowledge management and with illustrative examples from a variety of enterprises the authors address such topics as How family businesses can compete in the new knowledge economy How to manage a family business when knowledge is its main asset How to transfer knowledge and how to keep it alive through family generations Within this framework the authors argue that effective resource management especially intangible resources is central to enabling a family run organization to maintain a sustainable competitive advantage over time They note that families often develop systemic intuitive or tacit knowledge that transcends rational decision making and needs to be recognized and nurtured as a distinctive asset The authors demonstrate that trans generational value is achieved when the family firm innovates and adapts itself to changing external and internal conditions This kind of entrepreneurial performance requires dynamic capabilities and processes designed to acquire exchange combine and even shed knowledge and practices and in turn dynamic capabilities result from mechanisms of knowledge sharing collective learning experience accumulation and transfer **Development and Implementation of Range-wide Mission and Major Capabilities at White Sands Missile Range, New Mexico** ,2009 **The Story of Old Wairoa and the East Coast District, North Island, New Zealand; Or, Past, Present, and Future** Thomas Lambert, 1925 **Succeeding at Succession** Peter Bunton, 2023-06-09 By providing case studies of Christian organizations and networks which have recently undergone succession and drawing upon perspectives from leadership theory psychology organizational development and theology this work shows multiple overlapping aspects of succession These facets include plans processes gender implications theologies of leadership successor origins relationship between outgoing and incoming leaders selection methods and organizational beliefs manifested in succession ceremonies An analysis of the various successions studied reveals the need for the organization or network to reflect on its own understandings and theologies of leadership without so doing organizational succession could be impaired While exploring the complexities of leadership succession particularly founder succession this book provides clear lessons and guidance for those navigating such transitions in leadership Age and the Reach of Sociological Imagination Dale Dannefer, 2021-08-09 The dominant narratives of both science and popular culture typically define aging and human development as self contained individual matters failing to recognize the degree to which they are shaped by experiential and contextual contingencies Our understandings of age are thereby boxed in and

constricted by assumptions of normality and naturalness that limit our capacities to explore possible alternative experiences of development and aging and the conditions both individual and social that might foster such experiences Combining foundational principles of critical social science with recent breakthroughs in research across disciplines ranging from biology to economics this book offers a scientifically and humanly expanded landscape for apprehending the life course Rejecting familiar but false dichotomies such as nature vs nurture and structure vs agency it clarifies the organismic fundamentals that make the actual content of experience so centrally important in age and development and it also explores why attention to these fundamentals has been so resisted in studies of individuals and individual change and in policy and practice as well In presenting the basic principles and reviewing the current state of knowledge Dale Dannefer introduces multi levelled social processes that shape human development and aging over the life course and age as a cultural phenomenon organizing his approach around three key frontiers of inquiry that each invite a vigorous exercise of sociological imagination the Social Structural Frontier the Biosocial Frontier and the Critical Reflexive Frontier

Prisons, Punishment, and the Family Rachel Condry, Peter Scharff Smith, 2018-10-04 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality
