Family Life and Family Policies in Europe Franz-Xaver Kaufmann, 2002 This volume is a comparative study of family change in Europe and its dependency on social policy regimes The authors explore family discourse family law single parents gender relations the new fathers divorce and abortion within the framework of national policies vis a vis the family Conventional wisdom assumes that policy decisions affecting the life situation of a population shape different opportunities for private living particularly in relation to children and the family But the authors argue it would be too simplistic to assume a direct causal link between welfare policies for the family and developments in the family sector Family change is in fact mediated by institutional factors as well as by cultural traditions and political intervention The chapters in this volume deal with the substantial and methodological problems of ascertaining the impact of different national policy regimes on family change

Handbook of Marriage and the Family Marvin B. Sussman, Suzanne K. Steinmetz, Gary W. Peterson, 2013-06-29 To know where we are going as scholars educators and practitioners in the field of marriage and family life we first need to know where we have been A perusal of early texts on marriage and family life provides some thought provoking insights into the accuracy of the saying what goes around comes around It is interesting to note who has been considered to be in a position to provide information on marriage and family life Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p

Family Forms in Historic Europe Cambridge Group for the History of Population and Social Structure, 1983-03-10 The family forms of historic Europe have been fascinating in their variety Their

importance for the historical development of our continent would be difficult to exaggerate for our relationship with the peoples of the other continents of the world as well This book is an attempt to recover the different familial systems and compare them with one another The studies range from Russia Poland Hungary and Austria to Scandinavia Flanders and Britain All the influences which have affected the character and composition of European households are taken into account The analysis covers their function as productive work groups in the procreation and bringing up of children and in the support of the elderly and their relationship with the wider society and its norms along with its political organization central and local Claims that inheritance customs and inheritance practice and the occupation of the household head exerted a powerful influence on the size and composition of households are subjected to rigorous and systematic investigation

Family and the State of Theory David J. Cheal, 1991-01-01 Family studies play an increasingly important role in contemporary sociology David Cheal provides an up to date and comprehensive survey of modern sociological theories about family life While recognizing that these theories are both diverse and fragmented he argues that such divisions are a positive and integral aspect of studying contemporary family theory Cheal takes a broad comparative approach to the theories analysed using empirical examples from North America Europe and Australia and examining how old and new approaches interact with one another He argues that it is possible to make sense of a contemporary family theory by analysing its divisions as the result of different experiences of modernity These experiences lie along three axes first the opposition between social modernism and its anti modernist critics second the ideological effects of contradictions within modernity itself and third the emerging difference between modernist idealism and post modernist scepticism Another major theme of the book is the profound impact of feminism on contemporary family studies and how this has been the catalyst for so much rethinking of the subject in recent years By comparing a wide range of theories in this way and providing a conceptual framework to explain and encourage theoretical pluralism David Cheal has produced a major new work for students and researchers of family sociology and social theory worldwide

Family and Population in 19th Century America Tamara K. Hareven, Maris A. Vinovskis, 2015-03-08 Representing new approaches to the study of the family and historical demography this collection of essays analyzes the relationships of demographic processes in different population groups to household structure and family organization and their implications for family behavior Emphasizing dynamic rather than structural factors the essays thus move beyond earlier studies of family history Essays by the editors Richard Easterlin George Alter Gretchen Condran and Stanley Engerman focus on patterns of fertility in relation to urban and industrial development economic opportunity and the availability of land and race and ethnic origin The remaining essays by Laurence Glasco Howard Chudacoff and John Modell deal with family organization over time as affected by such factors as the practice of boarding the role of kin family budgeting strategy and migration The authors not only challenge the prevailing assumption that rapid urbanization is responsible for the decline in the fertility rate they also contend that contrary to the prevailing

Divorce in Europe R. Chester, 2012-12-06 Those who have sought information on the extent of divorce in the modern world will know that the most accessible sources lie in international yearbooks 1 and that from these it is possible to make certain broad comparisons of a historical or geographical kind For any one country for instance changes in the divorce rate can be traced or comparative rates for any number of countries at any given time can be examined Similarly it is possible to discover differences and similarities in divorce trends on an international basis either for individual nations or for regional or cultural clusters Typically however such sources cannot be used for detailed or sophisticated comparisons because of the limited volume of data and of the nature of the statistics presented To detect detailed differences in divorce propensity by time or place for instance ideally requires cohort data information on the number of marriages dissolved by divorce within one two x years among every 1 000 or 10 000 of marriages contracted in a given year Such data do not appear in the international statistical summaries which often do not even use the next best kind of measure namely divorces per 1 000 or 10 000 existing marriages Often the figures given are those for divorces per thousand of total population and these are of little comparative value because of variations in population structure

Beyond the Family A. F. Robertson, 1991-10-30 Reproduction is the most vital process in the regeneration of our species and our society Nevertheless its influence on the shape of the modern world has been consistently overlooked by social scientists who have emphasized the erosion of the family in industrialized societies In A F Robertson's view families persist And the goal of reproduction plays

an essential role in everything from the organization of political parties to the growth of banks and factories Robertson inverts the traditional wisdom that reproduction responds passively to the powerful transformative force of technology Reproduction he asserts requires such extensive cooperation on the state and community level as well as within the family that it has had great impact on our social and political organization Whether discussing Lesotho women and the South African economy or the effects of the family on the development of capitalism Robertson demonstrates that the ramifications of human reproduction extend far beyond the family Boldly argued and laced with cross cultural comparisons Beyond the Family synthesizes the writings of a range of thinkers It is sure to garner discussion and debate among divergent scholars of many stripes The Transition to Parenthood Gerald Y. Michaels, Wendy A. Goldberg, 1988-10-13 This 1988 book brings together leading scholars from a range of disciplines concerned with the study of the transition to parenthood The text discusses the reasons why some new parents experience an enhanced sense of self and a deepening of important relationships whereas others experience crisis and conflict **Agrarian Policies in Communist Europe** K.-E. Rudolph, 1995-01-01 In recent years the peasant household has become a central focal point of social history This is true not only because the peasant represents the major element of European society through the nineteenth century but also because many of the main issues in modern historical debate can be studied within the sphere of the peasant family This book deals with the European peasant family during the period of transformation from agrarian to industrial society the time called by some the period of protoindustrialization The essays in this volume explore some of the major issues concerning the influence of the economy society and institutions on the peasant household and conversely the influence of the peasant household on the outside world Themes dealt with include the ways in which the physical environment and the economy may make for very different family structures and even affect intra family relationships the effects of inheritance marriage and kinship strategies as well as social pressure on peasant family structure and demography the debate about changing gender roles and status the debate over the manner and effects of class formation questions of social and political agency the nature of gender and parent child relations the validity of protoindustrial theory and the role of peasants in initiating industrialization as consumers producers and as a labor force In examining these themes the essays provide both case studies and innovative analysis by preeminent international scholars in the fields of family and women's history economic history and demography **Families and Family Policies in Europe**
