Family Therapy Skills and Techniques in Action Mark Rivett, Joanne Buchmüller, 2017-10-02. Relationships are a resource for healing a range of psychological difficulties. This is the fundamental principle of family therapy, an increasingly influential form of psychotherapy that is building up a strong evidence base in a range of psychological problems across the life cycle. *Family Therapy Skills and Techniques in Action* is both a guide to a variety of family therapy techniques and a review of their history. It provides a thorough explanation of the techniques, explaining their origins and use in contemporary family practice, whilst guiding readers in learning new skills. The authors provide film examples and transcripts of the techniques in action so that readers can develop their skills in a practical way. The book is divided into sections that describe and demonstrate skills such as: Assessing a family, Building a therapeutic relationship with multiple family members, Enactment, Reframing, Using circular questions, Externalising the problem, Using family therapy skills in individual work, Understanding and utilising systemic supervision. *Family Therapy Skills and Techniques in Action* will be an essential practical manual for a range of family therapy skills which can be used in family work by family practitioners from a variety of backgrounds: counsellors, support workers, social workers, psychologists, generic therapists and nurses.

The Practice of Family Therapy Suzanne Midori Hanna, 2018-10-15. Now in its fifth edition, *The Practice of Family Therapy* comes at a time when traditional approaches to psychotherapy have given way to multidimensional strategies that best serve the needs of diverse groups who are grappling with the many challenges unique to family therapy practice. With expanded coverage of different models along with new developments in evidence-based and postmodern practices, this integrative textbook bridges the gap between science and systemic relational approaches as it guides the reader through each stage of family therapy. Part I lays the groundwork by introducing the first, second, and third generation models of family therapy, teaching the reader to integrate different elements

from these models into a systemic structure of practice Part II explores the practical application of these models including scripts for specific interventions and rich case examples that highlight how to effectively work with diverse client populations Students will learn how to make connections between individual symptoms and cutting edge family practices to respond successfully to cases of substance abuse trauma grief depression suicide risk violence LGBTQ families and severely mentally ill clients and their families Also included are study guides for each model and a glossary to review main concepts Aligned with the Association of Marital and Family Therapy Regulatory Boards AMFTRB knowledge and content statements this textbook will be key reading for graduate students who are preparing for the national licensing exam in marriage and family therapy
