Social Work with Families Carlton E. Munson, 1980 Up to now family practice books have focused almost exclusively on therapy in their approach to the complex problems facing the contemporary family This up to date collection of 32 articles on social work with families goes beyond any available book in its examination of the dynamics of family behavior It takes a comprehensive view of the American family using developmental theory to organize and illuminate the various aspects of family life and its relation to society Social Work with Families touches every facet of family dynamics that the social worker is likely to encounter in practice It begins with an overview of the major components of developmental theory the societal institutional group interactional and individual psychological aspects The following sections apply this analytic framework Thus in Part II the family is analyzed as an institution in relation to other institutions governmental economic educational and religious The third section focuses on the family experiencing problems as a unit e g marital difficult ties parent child conflict problems of indebtedness and other aspects of coping The final part considers the family in which an individual has been identified as the primary focus of concern because of retardation various physical malfunctions alcoholism emotional difficulties or terminal illness Because the developmental approach takes both institutional and individual elements of human behavior into account it offers a uniquely insightful means for viewing ethnic minority issues Social Work with Families makes a major contribution to the establishment of a logical integrated scheme for analyzing the family providing student and practitioner alike with a realistic framework for diagnosing and treating the American family in strife
