Stewart, 2014-11-26 This work provides biographies of more than 500 men and women who have served as admiral vice admiral or rear admiral While officers from the U S British French and Japanese navies make up the bulk of the work officers from 22 countries including Australia Canada Germany India Italy the Netherlands Russia and Spain are also included The main criterion for inclusion is that each person must have actively served in the rank of at least rear admiral but not necessarily in enemy action This effectively rules out people who were granted the rank on retirement as a courtesy title or posthumously The book also includes lists of admirals organized by nationality and by year of birth      The Sailor's Bookshelf James Stavridis, 2021-12-15 Admiral Stavridis a leader in military international affairs and national security circles shares his love of the sea and some of the sources of that affection The Sailor s Bookshelf offers synopses of fifty books that illustrate the history importance lore and lifestyle of the oceans and of those who go down to the sea in ships Stavridis colors those descriptions with glimpses of his own service sea stories in popular parlance that not only clarify his choices but show why he is held in such high esteem among his fellow sailors Divided into four main categories The Oceans Explorers Sailors in Fiction and Sailors in Non Fiction Admiral Stavridis choices will appeal to old salts and to those who have never known the sights of the ever changing seascape nor breathed the tonic of an ocean breeze The result is a navigational aid that guides readers through the realm of sea literature covering a spectrum of topics that range from science to aesthetics from history to modernity from solo sailing to great battles Among these eclectic choices are guides to shiphandling and navigation classic fiction that pits man against the sea ecological and strategic challenges celebrations of great achievements and the lessons that come with failure economic competition and its stepbrother combat explorations of the deep and poetry that beats with the pulse of the wave Some of the included titles are familiar to many while others are likely less well known but are welcome additions to this encompassing collection Admiral Stavridis has chosen some books that are relatively recent and he recommends other works which have been around much longer and deserve recognition      Nineteen-Gun Salute John B.

**Black Shoe Carrier Admiral** John B Lundstrom, 2013-02-15 The revisionist work about Admiral Frank Jack Fletcher who won his battles at sea but lost the war of public opinion A surface warrior Fletcher led the carrier forces in the Pacific that won against all odds at Coral Sea Midway and the Eastern Solomon s Despite these successes during the post war Fletcher had become one of the most controversial figures in U S naval history and was portrayed as a timid bungler who failed to relieve Wake Island and who deliberately abandoned the Marines at Guadalcanal

**Waiting for Dead Men's Shoes** Donald Chisholm, 2001 This monumental study provides an innovative and powerful means for understanding institutions by applying problem solving theory to the creation and elaboration of formal organizational rules and procedures Based on a meticulously researched historical analysis of the U S Navy s officer personnel system from its beginnings to 1941 the book is informed by developments in cognitive psychology cognitive science operations research and management science It also offers important insights into the development of the American administrative state highlighting broader societal conflicts over equity efficiency and economy Considering the Navy s personnel system as an institution the book shows that changes in that system resulted from a long term process of institutional design in which formal rules and procedures are established and elaborated Institutional design is here understood as a problem solving process comprising day to day efforts of many decision makers to resolve the difficulties that block completion of their tasks The officer personnel system is treated as a problem of organized complexity with many components interacting in systematic intricate ways its structure usually imperfectly understood by the participants Consequently much problem solving entails decomposing the larger problem into smaller more manageable components closing open constraints and balancing competing value premises The author finds that decision makers are unlikely to generate many alternatives since searching for existing solutions elsewhere or inventing new ones is an expensive difficult enterprise Choice is usually a matter of accepting rejecting or modifying a single solution Because time constraints force decisions before problems are well structured errors are frequently made problem components are at best only partially addressed and the chosen solution may not solve the problem at all and even if it does is likely to generate unanticipated side effects that worsen other problem components In its definitive treatment of a critical but hitherto entirely unresearched dimension of the administration of the U S Navy the book provides full details over time concerning the elaboration of officer grades and titles creation of promotion by selection sea duty requirements graded retirement staff line conflicts the
