Wijdicks, 2012-08-16 A major contribution to the literature in neurology from renowned neurointensivist Eelco F M Wijdicks MD PhD Famous First Papers for the Neurointensivist presents and critically assesses numerous papers that have made a profound impact on the diagnosis and treatment of neurologically acute conditions In general there has been little historical work in acute neurologic conditions precisely because neurology is not perceived

through this perspective Famous First Papers for the Neurointensivist addresses this problem by a scholarly treatment of early descriptions of clinical signs syndromes and presenting the development of treatment of these acute disorders Using a uniform and easy to read format the title offers a clear reproduction of each paper s title page a short historical note and a brief discussion and its implications and a final comment to provide perspective Landmark clinical trials that apply to acute neurology are included and the book also briefly discusses the birth of intensive care units Ground breaking and indispensable for all physicians and researchers interested in neurocritical care Famous First Papers for the Neurointensivist is a unique original reference providing not only a single source for discovering the most important papers in the field but also a critical analysis of the impact of each paper on the development of neurocritical care Dr Wijdicks has been integral to the growth and development of neurocritical care as a specialty He has cultivated it firsthand serving as a contemporary of Raymond Adams C Miller Fisher and Allan Ropper all pioneers in acute neurological care He established the neurocritical care program at the Mayo Clinic in the early 1990s and has served as the editor in chief of the journal Neurocritical Care which was first published in 2004 after the foundation of the Neurocritical Care Society His unique vantage point allows him to bring us a book that few others could produce Famous First Papers for the Neurointensivist This book is an original in the field and should be on the reading list of anyone who cares for critically ill neurologic and neurosurgical patients Reading this book from cover to cover is highly recommended The writing is clear and concise and the transitions are smooth Each essay is self contained and allows the reader to set his or her own pace Once completed the book serves as a great reference book because each essay stands on its own The photographs of the manuscripts title pages and key tables and figures are of high quality and a translation is provided if the original work was not in English Dr Wijdicks has sifted through the library stacks and has emerged with a book that puts the specialty of neurocritical care into historical perspective In order to know where you are going you must first know where you have been This holds especially true for neurocritical care because the specialty continues to grow and flourish JAMA NEUROL VOL 70 NO 4 APR 2013 WWW JAMANEURO COM **Vladimir**

Space, Geometry, and Kant's Transcendental Deduction of the Categories Thomas C. Vinci,2015 Thomas C Vinci aims to reveal and assess the structure of Kant s argument in the Critique of Pure Reason called the Transcendental Deduction of the Categories At the end of the first part of the Deduction in the B edition Kant states that his purpose is achieved to show that all intuitions in general are subject to the categories On the standard reading this means that all of our mental representations including those originating in sense experience are structured by conceptualization But this reading encounters an exegetical problem Kant states in the second part of the Deduction that a major part of what remains to be shown is that empirical intuitions are subject to the categories How can this be if it has already been shown that intuitions in general are subject to the categories Vinci calls this the Triviality Problem and he argues that solving it requires denying the standard reading In its place he proposes that intuitions in general and empirical intuitions constitute disjoint classes and that while all intuitions for Kant are unified there are two kinds of unification logical unification vs aesthetic unification Only the former is due to the categories A second major theme of the book is that Kant s Idealism comes in two versions for laws of nature and for objects of empirical intuition and that demonstrating these versions is the ultimate goal of the Deduction of the Categories and the similarly structured Deduction of the Concepts of Space respectively Vinci shows that the Deductions have the argument structure of an inference to the best explanation for correlated domains of explananda each arrived at by independent applications of Kantian epistemic and geometrical methods
