Ecophysiology of Desert Arthropods and Reptiles John L. Cloudsley-Thompson, 2012-12-06 Ecophysiology of Desert Arthropods and Reptiles starts with a new classification of the world's deserts based upon the type of precipitation and the effect on their faunas of arthropods and reptiles This is followed by an account of microclimates and the avoidance of environmental extremes Whereas thermoregulation is primarily behavioural responses to water shortage are largely physiological Seasonal activity and phenology are described adaptations for burrowing the avoidance of enemies and defence are also outlined A comparative account of interspecific relationships feeding specializations and species diversity in the two taxa is described The purpose of the book is to provide a new and up to date analysis that will stimulate further research along these lines

Introduction to Horned Lizards of North America Wade C. Sherbrooke, 2003-05-08 Horned lizards have long inspired curious humans from ancient Indian rock artists and the earliest Spanish explorers to modern scientists These lizards specialize on ants for food employ distinctive defensive tactics for different enemies arch their bodies to collect rainwater and exhibit numerous other adaptations to arid environments Wade Sherbrooke's wonderful book packed with facts and personal insights will give everyone from lay naturalists to seasoned field biologists a new appreciation for these magically bizarre animals Harry W.
