Ecology Of Plants In The Tropics:

Ecology of plants in the tropics Daniel H. Janzen, 1977 *Physiological Ecology of Tropical Plants* Ulrich Lüttge, 2013-03-09 This richly illustrated text covers the ecophysiology of plants of all major tropical ecosystems from tropical rain forests epiphytic habitats mangroves and savannas to salinas inselbergs and paramos and their ecophysiological adaptation to these different tropical environments The physiognomy of biotopes and characteristic life forms of plants are depicted with photographs *Physiological Ecology of Tropical Plants* Ulrich Lüttge, 2007-12-14 Since the publication of the first edition of this book ten years ago international research into the physiological ecology of plants in the tropics has increased enormously in quantity and quality This brand new edition brings the story right up to date New approaches have been developed in remote sensing while at the other end of the scale molecular biology has come on in leaps and bounds particularly regarding ecological performance of tropical plants e g in understanding the adaptation of resurrection plants to the extreme habitat of inselbergs In this fully revised and updated second edition the wealth of new information has made it necessary to break large chapters down into smaller ones *Physiological ecology of plants of the wet tropics* Ernesto Medina, H.A. Mooney, C. Vazquez-Yanes, 2012-12-06 This book contains the results of a Symposium on the physiological ecology of plants of the lowland wet tropics held in Mexico in June 1983 organized by the Instituto de Biología of the National University of Mexico U N A M and sponsored by UNAM CONACYT NSF and UNESCO CIET A workshop portion of the Symposium was held at the tropical research station at Los Tuxtlas Veracruz This Symposium originated in response to the increasing interest in the physiological ecology of tropical plants because of the potential of this field to provide a basic understanding of functioning of tropical plant communities The study of physiological ecology of tropical plants has been delayed in some cases by the lack of conceptual framework but also by the absence of appropriate instrumentation and techniques with which to conduct precise measurements under high temperature high humidity field conditions Hypotheses and concepts of the physiological ecology of tropical plants have been based mainly on observational data and the analysis of growth forms and leaf anatomy The early work of A F W Schimper and O Stocker in Asia and the extensive surveys made by H Walter on the osmotic potentials of plants in the tropics and subtropics constituted until relatively recently the only available information on the water and carbon relations of tropical plants *Physiological ecology of plants of the wet tropics* Ernesto Medina, H.A. Mooney, C. Vazquez-Yanes, 1983-12-31 This book contains the results of a Symposium on the physiological ecology of plants of the lowland wet tropics held in Mexico in June 1983 organized by the Instituto de Biología of the National University of Mexico U N A M and sponsored by UNAM CONACYT NSF and UNESCO CIET A workshop portion of the Symposium was held at the tropical research station at Los Tuxtlas Veracruz This Symposium originated in response to the increasing interest in the physiological ecology of tropical plants because of the potential of this field to provide a basic understanding of functioning of tropical plant communities The study of physiological ecology of tropical plants has been

delayed in some cases by the lack of conceptual framework but also by the absence of appropriate instrumentation and techniques with which to conduct precise measurements under high temperature high humidity field conditions Hypotheses and concepts of the physiological ecology of tropical plants have been based mainly on observational data and the analysis of growth forms and leaf anatomy The early work of A F W Schimper and O Stocker in Asia and the extensive surveys made by H Walter on the osmotic potentials of plants in the tropics and subtropics constituted until relatively recently the only available information on the water and carbon relations of tropical plants Reproductive Ecology of Tropical Forest Plants K.S. Bawa, M. Hadley, 1991-01-15 Reproductive Ecology of Tropical Forest Plants reviews recent developments in the reproductive ecology of tropical forest plants and explores the implications of current findings on forest structure function management and conservation It examines how insights gained from reproductive ecology can be helpful in the management of tropical forest resources and discusses directions of future research Physiological Ecology of Plants of the Wet Tropics Ernesto Medina, H.A. Mooney, C. Vazquez-Yanes, 1984 Proceedings of an International Symposium held in Oxatepec and Los Tuxtlas Mexico June 29 to July 6 1983 **Tropical Ecology** John C. Kricher, 2011-02-28 A comprehensive introduction to tropical ecology This full color illustrated textbook offers the first comprehensive introduction to all major aspects of tropical ecology It explains why the world's tropical rain forests are so universally rich in species what factors may contribute to high species richness how nutrient cycles affect rain forest ecology and how ecologists investigate the complex interrelationships among flora and fauna It covers tropical montane ecology riverine ecosystems savanna dry forest and more Tropical Ecology begins with a historical overview followed by a sweeping discussion of biogeography and evolution and then introduces students to the unique and complex structure of tropical rain forests Other topics include the processes that influence everything from species richness to rates of photosynthesis how global climate change may affect rain forest characteristics and function how fragmentation of ecosystems affects species richness and ecological processes human ecology in the tropics biodiversity and conservation of tropical ecosystems and species Drawing on real world examples taken from actual research Tropical Ecology is the best textbook on the subject for advanced undergraduates and graduate students Offers the first comprehensive introduction to tropical ecology Describes all the major kinds of tropical terrestrial ecosystems Explains species diversity evolutionary processes and coevolutionary interactions Features numerous color illustrations and examples from actual research Covers global warming deforestation reforestation fragmentation and conservation The essential textbook for advanced undergraduates and graduate students Suitable for courses with a field component Leading universities that have adopted this book include Biola University Bucknell University California State University Fullerton Colorado State University Fort Collins Francis Marion University Michigan State University Middlebury College Northern Kentucky University Ohio Wesleyan University St Mary's College of Maryland Syracuse University Tulane University University of California Santa Cruz University of Central Florida University of Cincinnati University of Florida University of Missouri

University of New Mexico University of North Carolina at Chapel Hill University of the West Indies **Pollination of Cultivated Plants in the Tropics** Food and Agriculture Organization of the United Nations,1995-01-01 This bulletin based on contributions from various contributors and edited by Dr D W Roubik introduces the reader to various aspects of natural and insect pollination It discusses the pollinators themselves and the ecological and economic importance of pollination as well as applied pollination in temperate tropical oceanic islands and mainland tropics and alternatives to artificial pollinator populations Prospects for the future are also discussed Chapter 2 deals with successful pollination with pollinator populations the evaluation of pollinators and floral biology and research techniques The behaviour of pollinators and plant phenology and various case studies on the preparation of pollinators for use in tropical agriculture are also discussed A glossary and various appendices regarding cultivated and semi cultivated plants in the tropics pollination contracts and levels of safety of pesticides for bees and other pollinators are included **Tropical Forest Plant Ecophysiology** Stephen S. Mulkey,Robin L. Chazdon,Alan P. Smith,2012-12-06 Taking readers out of the laboratory and into the humid tropical forests this comprehensive volume explores the most recent advances occurring in tropical plant ecophysiology Drawing on the knowledge of leading practitioners in the field this book synthesizes a broad range of information on the ways in which tropical plants adapt to their environment and demonstrate unique physiological processes This book is arranged into four sections which cover resource acquisition species interactions ecophysiological patterns within and among tropical forest communities and the ecophysiology of forest regeneration These sections describe plant function in relation to ecology across a wide spectrum of tropical forest species and growth forms How do different species harvest and utilize resources from heterogeneous tropical environments How do patterns of functional diversity reflect the overwhelming taxonomic and morphological diversity of tropical forest plants Such fundamental questions are examined in rich detail To illuminate the discussions further every chapter in this book features an agenda for future research extensive cross referencing timely references and the integration of ecophysiology and the demography of tropical species where the data exist Tropical Forest Plant Ecophysiology provides plant scientists botanists researchers and graduate students with important insights into the behavior of tropical plants Biologists and foresters interested in tropical ecology and plant physiological ecologists will also benefit from this authoritative and timely resource **Tropical Forest Canopies: Ecology and Management** Karl-Eduard Linsenmair,2001 **Physiological Ecology of Plants of the Wet Tropics** E.
