**Antiviral Strategies** Hans-Georg Kräusslich, Ralf Bartenschlager, 2008-12-02 A crucial issue for antiviral therapy is the fact that all antiviral substances rapidly select for resistance thus monitoring and overcoming resistance has become a most important clinical paradigm of antiviral therapy This calls for cautious use of antiviral drugs and implementation of combination therapies In parallel efforts in drug discovery have to be continued to develop compounds with novel mode of action and activity against resistant strains This book reviews the current status of antiviral therapy from the roads to development of new compounds to their clinical use and cost effectiveness Individual chapters address in more detail all available drug classes and outline new approaches currently under development *Encyclopedia of Government and Politics* M. E. Hawkesworth, Maurice Kogan, 2004 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers

**HIV/AIDS in Europe** World Health Organization. Regional Office for Europe, 2006 Tells the story of HIV AIDS in Europe from a broad variety of perspectives bio medical social cultural economic and political The authors are leading experts from across the region and include both the infected and the affected be they doctors or former drug users United Nations employees or gay men public health researchers or community activists They describe how from the first documented cases in 1981 to the present era of antiretroviral management controlling the human immunodeficiency virus in Europe has provided elusive *Aids in the World* Jafar Mahmud, 2004 The Socioeconomic Impact of COVID-19 on Eastern European Countries Rafał Wisła, Paweł Dykas, 2021-11-15 The year 2020 went down in economic history due to the dramatic and drastic changes in economic and social conditions that resulted from the outbreak of the global pandemic of COVID 19 This book offers a multi level narrative about the pandemic written from national and international perspectives enabling the authors to construct several macro and mega scenarios The book consists of six chapters Four of them discuss the process of the COVID 19 pandemic caused by the SARS CoV 2 virus in Europe in 2020 i e the directions and dynamics of the spread and its socioeconomic consequences and provide a comparative analysis of fiscal and monetary packages employed by Europe with an emphasis on Eastern European countries The

remaining two chapters contain forecasts and scenarios The fifth chapter dedicated to forecasts provides readers with a comprehensive description of possible consequences of any epidemic leading to severe social losses such as high percentages of infected and dead limited interpersonal contacts as a result of lockdown a lowered level of general individual and social well being as well as economic losses for example a decline in production as a result of the collapse of aggregate demand and a reduction in the supply capacity of the economy consequently slowing down the pace of capital accumulation The sixth final chapter describes possible scenarios of the spread of the pandemic in Poland and Ukraine depending on measures taken by the governments of those countries The Socioeconomic Impact of COVID 19 on Eastern European Countries is designed as a practical reference for scholars researchers and policymakers The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

*Digital Technologies* Paolo Guerrieri, Sara Bentivegna, 2011-01-01 The Economic Impact of Digital Technologies offers a profoundly illuminating examination of ICT transformations in Europe and its critical role in greater social inequality It presents scholars and policy makers with original and practical tools to benchmark and assess the ICT diffusion and inclusion process The core message of book is that a coherent European strategy for embedding ICT technologies in society is long overdue Social differences in ICT use persist and are in some cases widening yet despite this fact there is a dearth of research on remedying digital inequalities This is of particular importance given that relative levels of ICT use investment and research can often explain variations in economic performance between industrialised countries The purpose of this book is to fill the gap in the literature by presenting key evidence on the economic benefits and costs deriving from investment in an inclusive information society The authors propose indicators and indexes of digital development and e Inclusion and its flip side e exclusion to assess the relationship between inclusive ICT and wider economic and social performance in Europe Presenting the methodology to monitor countries performance and ICT use together with original measures and policy suggestions this book will be indispensable to policymakers scholars and postgraduate students in a variety of areas including economic growth innovation industrial and organizational studies information and technology European studies and public and social policy

Economics and HIV Deborah Johnston, 2013-05-29 This book explains how and why economics has been applied to a terrible pandemic using a range of examples mostly drawn from the region most affected sub Saharan Africa Part I shows that microeconomic approaches have found fertile ground in a public health approach that blames individual choices for HIV transmission Despite their attractiveness however these approaches fail to explain contemporary patterns of HIV prevalence illustrating the importance of factors that are excluded from the standard micro economic approach Part II of the book looks at our problems in understanding the economic impact of AIDS and

explains why economists cannot agree if epidemic disease is a good or bad thing for economic development In both sections of the book the potential for alternative approaches is shown and the book ends by arguing that a political economy approach can bring meaningful insights to our understanding of the spread and impact of HIV AIDS      **HIV Epidemics in the**

**European Region** Lucy Platt, Emma Jolley, Vivian Hope, Alisher Latypov, Peter Vickerman, Ford Hickson, Lucy Reynolds, Tim Rhodes, 2015-02-12 This report describes the dynamics of HIV epidemics among vulnerable and high risk populations in the European region in particular people who inject drugs sex workers and men who have sex with men It aims to inform future HIV responses and guide HIV prevention surveillance and research      **ECCWS 2022 21st European Conference on**

*Epidemic* Feng Zhao, Clemens Benedikt, David Wilson, 2020-06-26 The Eastern Europe and Central Asia region has the world's fastest growing HIV epidemic Although still concentrated the epidemic has diversified affecting several key populations in many countries This change has increased the number of people in need the ways the epidemic can spread and the complexity of formulating an effective strategy to combat it At the same time international funding is insufficient to cover the growing need and domestic plans to cover the funding gaps in many cases fall short In this environment the need to use data to make the best possible decisions about using available funds is essential *Tackling the World's Fastest Growing HIV Epidemic* tells the story of how in 11 countries across Eastern Europe and Central Asia small groups of decision makers and experts came together to carry out innovative groundbreaking analyses for each country It details the steps these nations have taken to strengthen their HIV programs based on the findings while highlighting critical issues for the road ahead In so doing the book also shows the potential of what can be done with a mathematical model and how it can support real life improvements in policy and more efficacious budget allocations It is the record of a unique undertaking to improve public health investments that offers lessons for many communities      **AIDS Research at EC Level** Andre E. Baert, 1995 At EC level the fight against

AIDS one of the major health problems and socioeconomic diseases today is also part of the specific RTD programme in the field of biomedicine and health About 600 research teams are collaborating within 30 concerted actions networks that are underpinned by centralised facilities For example the epidemiology research networks are monitored by the WHO EC collaborating centre in St Maurice France Common experiments on animal models antiviral screening genetic analysis of multiple virus strains and provision of reagents for vaccine development are also centralized facilities in AIDS research carried out under the principles of subsidiarity and Community added value This publication presents an overview of their ongoing research activities in disease control and prevention viro immunological research clinical research and vaccine development Covered by Current Contents Life Sciences ISI volume 38 no 19 May 1995 p 11 12 Therefore for anyone doing AIDS research this is a must volume to have in order to understand what the European Community is doing in AIDS research

Highly recommended for all medical and academic libraries H Robert Malinowsky The University of Illinois Chicago USA  
AIDS Book Review Journal no 27 June 1996      **Encyclopedia of AIDS** Raymond A. Smith, 1998-08-27 First Published in  
1998 Routledge is an imprint of Taylor Francis an informa company      The HIV Pandemic Peter Piot, 2007-12-14 As we  
approach the 25th anniversary of the first recognition of HIV AIDS in 1981 this book reflects on the international impact of  
the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been  
infected since that date This ambitious book written by 165 authors from 30 countries offers a multi country comparative  
study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and  
health systems of the individual countries affected Increasingly the shift of health systems has been from prevention only as  
the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services  
including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals  
and users of the services have been forced to think differently about how services are financed how resources are allocated  
how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored  
and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in  
attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each  
country and its health system Most chapters combine a health policy expert with an HIV specialist allowing both a top down  
health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide  
an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific  
country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of  
knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue
