Albert Berry, 2013-03-14 Canada and the countries of Latin America are in the midst of major changes and choices in the area of labor markets and related social policy. These decisions are likely to have profound consequences for the quality of life of workers throughout the hemisphere. Labor Market Policies in Canada and Latin America: Challenges of the New Millennium reviews the evidence of Canada and Latin America on three major labor policy instruments: unemployment insurance, minimum wages and training, and on the effects of the payroll taxes which are the main means of funding the unemployment insurance system and other components of social expenditure. This is the first study attempting an in-depth comparison of these labor policy instruments between Canada and Latin America. The useful juxtaposition of Canadian and Latin American experiences comes at a time when the trend in Canada is to back away from the perhaps overly generous or ineffectively administered elements of the labor legislation, social security net, and when Latin American countries have undertaken significant reforms of their past systems but require further changes to move toward the sorts of legislation and support systems that characterize developed countries. The experiences of Canada and Latin America are mutually relevant since all are small economies forced to adjust to events at the world or hemispheric level and most are inclined to approach policy in an intermediate fashion which falls between the more market-oriented American and the more interventionist European models. Together with its comparative aspect, this volume attempts a more balanced and in-depth assessment in each of the policy areas than has hitherto been available. The gradually increasing base of available empirical data on the period after the reforms has been used in the studies which provide thorough syntheses of the available research for Canada and Latin America. Journal of Social and Economic Development, 2001. With reference to India. **Economic Restructuring, Technology Transfer and Human Resource Management** B. Virmani, K. Rao, 1997. Multinational Enterprises and the Global Economy John H. Dunning, Sarianna M. Lundan, 2008-01-01. For many years to come, this volume is surely going to be the ultimate reference work on international business. Thanks to Dunning and Lundan, we have at our disposal a wealth of relevant data as well as theoretical and empirical analyses which will enable us to assess the capabilities, contributions, and challenges posed by the multinational enterprises to the global economy. See Hirsch International Business Review. Multinational Enterprises and the Global Economy has become a classic in international business. Yet the book's second edition is even better than the first, in part because of Professor Dunning's wise decision to choose Dr. Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business-government relations and the societal effects of firm behaviour. In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies. The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage, not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into

the societal effects of MNEs and the role of business government relations in the IB context Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business It is encyclopedic yet full of incisive insights It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business Alan M Rugman University of Reading UK The rise of the multinational enterprise and the consequent globalisation of the world economy was arguably the single most important phenomenon of the second half of the twentieth century This magisterial book written by two leading authorities examines this phenomenon in depth It explains how foreign investment by multinationals diffused advanced technologies and novel management methods driving productivity growth in Europe Asia and North America however economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones This new edition of a classic work is not only an authoritative guide to contemporary multinational business but a major historical resource for the future Mark Casson University of Reading UK This thoroughly updated and revised edition of a widely acclaimed classic text will be required reading for academics policymakers and advanced students of international business worldwide Employing a distinctive and unified framework this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity and its effects on the economic and social well being of developed and developing countries Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs and the role of MNE activity in transmitting and facilitating institutional change Since the initial publication of this book more than a decade ago the economic managerial and social implications of globalisation and technological advancement have become even more varied and prominent Accompanying these developments there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever changing physical and human environment Drawing on articles and books from international business and economics as well as economic geography political economy and strategic management a systematic overview of the developments in scholarly thinking is prese
