Economic Summits And Western Decision Making:

Economic Summits and Western Decision-Making Cesare Merlini, 2017-10-10 Since 1975 the leaders of the major western economies have gathered in annual summit meetings to try to agree a unified response to the main political and economic problems facing them This book first published in 1984 traces the development of the summit meetings and tries to assess their impact on western decision making and international relations in general The summits arose as the product of a serious crisis that shook the world economy in the early 1970s They have been sustained because of the waning of the American hegemony that had supported the postwar international economic regime From this it became vital for the leaders of the major economies to reassert collective leadership in order to try to re establish a new world economic equilibrium

This Adelphi Paper is the first concise yet comprehensive analysis of the role of the G8 in international peace and security It argues that the G7 8 has a long and impressive history in the field of international security The G7 8 has for example spearheaded the introduction of low politics and soft security to the top table of great power diplomacy and

integrated Japan and later Russia into the realm of Western security discussions In questions of war and peace the G8 does not command the legitimacy of the UN Security Council but for the international community is a more acceptable vehicle than unilateral action As such the G8 can be seen as a not worthy second best option after the UN Security Council This Paper further argues that China should be admitted into the G8 first as an observer and later as a member There is also a strong argument for the European Union to have one seat at the G8 even if such a change does not seem realistic today The G8 bears great resemblance to the 19th century Concert of Europe Whether it will assume a similar role in the 21st century depends in the final analysis on whether the United States welcomes such a role for the G8

Presidential Selection

Alexander Heard, Michael Nelson, 1987 This study incorporates three important themes into the study of presidential selection What are the international implications of how the United States chooses its presidents How does the process affect other nations Does it enhance or diminish the ability of the United States to deal effectively with the rest of the world How do the changing characteristics of the presidential selection process affect the shaping of public policies and vice versa For example how have changes in citizen participation campaign technologies and campaign finance laws altered the balance of political power among institutions and interests What is the influence of the Constitution on presidential selection as in the prescribed qualifications for the office and in provisions for unusual circumstances
