## **Economic Transformation In Eastern Europe And East Asia A Challenge For Japan And Germany:**

*Economic Transformation in Eastern Europe and East Asia* Herbert Hax, Wolfgang Klenner, Willi Kraus, Tomoo Matsuda, Takafusa Nakamura, 2012-12-06 The economic transformation taking place in Eastern Europe and Asia is in particular a challenge for Japan and Germany because these two states as the immediate neighbors of the developing regions are directly affected and also because they are the strongest economic powers in their regions and have the necessary potential to influence developments there Japan and Germany are affected in many ways both positively and negatively Should the economic and social transformation run into difficulties leading to economic and political chaos perhaps even to armed conflicts then economy and social fabric of the prosperous neighbors would doubtlessly suffer In the past Japan and the South East Asian region have already experienced how economic problems in China caused millions of Chinese to seek their fortunes in other countries An economic and political destabilization of China would today probably have even greater effects on migration flows Similar effects can be expected in Europe if the transformation process in Eastern Europe should fail But even less dramatic developments in Eastern Europe and East Asia can have deleterious consequences for Germany and Japan Both nations are linked closely to the transforming economies near them though at a fairly low level A reduction in trade with them a refusal to service debts and other economic frictions ensuing out of economic and political troubles would of necessity hamper the prosperity of Japan and Germany A successful transformation process would without doubt benefit all economic partners to a considerable extent

**Economic Transformation in Eastern Europe and East Asia** Herbert Hax, Wolfgang Klenner, Willi Kraus, 1995-11-01 The changes taking place in Eastern Europe and Asia are a particular challenge for Japan and Germany As the immediate neighbours they are both affected by the economic and social transformations in these regions Yet since they are strong economic powers they have the potential necessary to influence developments such that Eastern Europe and Asia advance to reciprocal advantage This volume looks into a wide range of possible supportive measures as far as capital labour and regulatory systems are concerned with reference to the specific economic and historic features of Japan and Germany taking into account the current weakness of the American dollar and the costs of reunification

**Asia's Flying Geese** Walter F. Hatch, 2011-03-15 In *Asia's Flying Geese* Walter F Hatch tackles the puzzle of Japan s paradoxically slow change during the economic crisis it faced in the 1990s Why didn t the purportedly unstoppable pressures of globalization force a rapid and radical shift in Japan s business model In a book with lessons for the larger debate about globalization and its impact on national economies Hatch shows how Japanese political and economic elites delayed but could not in the end forestall the transformation of their distinctive brand of capitalism by trying to extend it to the rest of Asia For most of the 1990s the region grew rapidly as an increasingly integrated but hierarchical group of economies Japanese diplomats and economists came to call them flying geese The lead goose or most developed economy Japan supplied the capital technology and even developmental norms to second tier geese such as Singapore and South Korea which themselves traded with Thailand Malaysia and the Philippines and so on down the V shaped line to Indonesia and coastal China Japan s model of capitalism which Hatch calls relationalism was thus fortified even as it became increasingly outdated Japanese elites enjoyed enormous benefits from their leadership in the region as long as the flock found ready markets for their products in the West The decade following the collapse of Japan s real estate and stock markets would however see two developments that ultimately eroded the country s economic dominance The Asian economic crisis in the late 1990s destabilized many of the surrounding economies upon which Japan had in some measure depended and the People s Republic of China gained new prominence on the global scene as an economic dynamo These changes Hatch concludes have forced real transformation in Japan s corporate governance its domestic politics and in its ongoing relations with its neighbors

**Transformations in Hungary** Peter Meusburger, Heike Jöns, 2012-12-06 During the first decade after the turn towards democracy and market economy Hungary s society experienced profound changes The book analyses related political legal institutional and socio economic structures and processes in order to contribute to a further understanding of Hungary s ongoing transformation processes and its current situation as one of the leading candidates for EU membership The topics include constitutive elements of a modern market economy as well as education income structures the poverty situation post communist voting behaviour regional and urban development and Hungary s cross border co operations The role of Budapest within the European city system and Hungary s economic situation within Europe are also discussed Drawing together comprehensive empirical data and a great variety of viewpoints the book offers innovative examples of the application of different theoretical approaches to

professors researchers and students     The Economy and Economics After Crisis Jüri Sepp, Dean Frear, 2011-01-01  
*JOURNAL OF ECONOMICS LITERATURE* ,1996     *Central and Eastern Europe in Transition* Frank H. Columbus, 1998  
 Central and Eastern Europe present more than a trivial challenge to the Developed Nations of the world as well as to themselves Will they represent new markets new sources of low cost labour or populations taking every action and avenue conceivable to emigrate to the Developed Nations Will they be integrated into the Western economies and political structures or lose themselves into defensive postures and pose threats to the Developed Nations This new series is intended to present current analyses of political and economic developments and trends in this crucial part of the world     *A Bibliography on Foreign and Comparative Law* ,1955     **Welfare States in Transition** Gøsta Esping-Andersen, 1996-05-21 This wide ranging comparative analysis of contemporary and future changes in welfare states looks at the different trajectories of the welfare states of Europe North America the Antipodes and the emerging scenarios in Latin America East Asia and Central and Eastern Europe Leading experts on each of these regions examine the current structures of social protection consider the causes of the current welfare state crisis and highlight evolving trends for welfare policy Different welfare states are shown to manifest different forms of crisis Among the symptoms of crisis Welfare States in Transition suggests that the effect of population ageing is exaggerated and an at least equally fundamental challenge lies in the revolution of the modern family and the changing economic role of women The contributors are sceptical about the neo liberal formula for reform not only because it increases inequality but also because it does not address the growing need for an active social investment policy to ensure against entrapment in poverty or low paid jobs     **Hitler's Foreign Policy 1933-1939** Gerhard L. Weinberg, 2010-03-01 Hitler's path to war consisted of two different stages that paralleled the internal development of Germany From 1933 to the end of 1936 he created a diplomatic revolution in Europe From a barely accepted equal Germany became the dominant power on the continent With the remilitarization of the Rhineland the stalemate in the Spanish Civil War the forming of the Axis and the signing of the Anti Comintern Pact the first phase was completed In the second phase the diplomatic initiative in the world belonged to Germany and its partners Germany's march toward war therefore became the central issue in world diplomacy     Japanese-Russian Relations, 1907-2007 Joseph Ferguson, 2008-04-03 This book provides a comprehensive survey of Japanese Russian relations from the end of the Russo Japanese War until the present Based on extensive original research in both Japanese and Russian sources it traces the development of relations from the tumultuous pre war period through the Second World War Cold War and post Cold War periods Considering the wider international situation domestic influences and ideological factors throughout it shows how the hopeful period of the late 1990s when Japanese Russian relations briefly ceased to be acrimonious and it seemed that normal relations might be established was not unique Joseph P Ferguson argues there have been several previous occasions when rapprochement seemed possible which in the end proved elusive rapprochement frequently becoming the victim of domestic factors which frequently worked against

and took precedence over good relations The book concludes with an assessment of the present situation and of how relations are likely to develop in the immediate future
