The Economic Effects of Restrictions on Government Budget Deficits Christian Ghiglino, Karl Shell, 1998 In overlapping generations economies with perfect financial markets and lumpsum taxation restrictions on the government budget deficits do not limit the set of achievable allocations For economies in which tax instruments are distortionary and limited in number deficits are irrelevant only in the unrealistic case in which the number of tax instruments is large relative to the number of policy goals In particular if the government can use only anonymous consumption taxes then achieving the prescribed deficits without changing the equilibrium allocation will typically be impossible when the number of consumers exceeds the number of commodities A similar result holds if consumer credit is exogenously restricted Surprisingly in this case distortionary taxes may be more likely than lump sum taxes to lead to the irrelevance of government deficits Journal of Economic Literature Classification Numbers D51 D91 E32 Keywords Balanced Budget Balanced Budget Amendment Burden of the Public Debt Comparative Statics Consumption Taxes Credit Restrictions Distortionary Taxes Economic Policy Government Budget Deficit Maastricht Treaty Optimal Taxation Overlapping Generations

Congress. House. Committee on Government Operations,1950 Modernizing Government Budget Administration Public Administration Service,1962 **The Economics of Human Rights** Ruud Bronkhorst,2021-01-05 This book provides new insights into combining economic theory and ethics and how to formulate policies to combat the roots of poverty Since a large part of the world s working population is underpaid and does not have enough income to feed themselves and their families there is a need for an alternative approach to producer prices than the usual neo classical approach with its emphasis on market and equilibrium prices This book is an introduction to the Living Income Fair Price approach a price theory based on ethics and Universal Human Rights The book explains why there is a need for a paradigm change in our thinking about prices by explaining why the usual market prices rarely are equilibrium prices Besides market disturbing elements like monopolies and oligopolies the needs of the poorest parts of the population are not taken into consideration because they are not reflected in the effective demand This means that the way our producers are paid needs a drastic overhaul especially in a critical area like food production An important part of the book is devoted to the need to pay and the possibilities for paying a decent price to smallholder farmers The underpayment of small food producers means they have no possibility to invest and are not able to prepare for the future This is even more pressing now that climate change demands that every farmer must adjust to changing circumstances and adapt new production methods Although primarily meant for economists the book meant also to stimulate discussion amongst those involved in agricultural policies both in developing and developed countries
