Katzner,2018 This book provides a practitioner s foundation for the process of explanatory model building breaking down that process into five stages Donald W Katzner presents a concrete example with unquantified variable values to show how the five stage procedure works He describes what is involved in explanatory model building for those interested in this practice while simultaneously providing a guide for those actually engaged in it The combination of Katzner s focus on modeling and on mathematics along with his focus on the explanatory performance of modeling promises to become an important contribution to the field      **At the Edge of Camelot** Donald W. Katzner,2011-05-11 This book tells the story of an academic department that underwent rapid wrenching changes at a time and in a place that one would not have expected them to have occurred The time was the late 1960s through the 1970s and the place was a public university heavily dependent on state funding The Cold War was raging the US public was fearful of communism and the Soviet Union and politicians were speaking to these fears for political ends Protests against racial discrimination and the Vietnam War were creating social disorder and sometimes inciting violence And the Economics Department at the University of Massachusetts at Amherst was in turmoil In this environment a significant proportion of the Department s visible faculty of traditional economists was rapidly created In spite of the anti Marxist political climate and the dependence of the university on state politicians for funding these traditional economists were quickly replaced by a significant and visible group of Marxian economists The story told covers the particulars of the background for these events relating to the University of Massachusetts the political activism of the period and the state of the economics profession In considerable detail Katzner describes the events the multi year turmoil within the Economics Department associated with them the eventual resolution of that turmoil into an intellectually exciting and friendly atmosphere the significance of the events in terms of academic endeavor and their legacy for the economics profession
