Economics Of Empire Britain Africa And The New Imperialism 1870 1895:

The Economics of Empire William G. Hynes, 1979 **An Economic History of Imperial Madagascar, 1750-1895**

Gwyn Campbell, 2005-03-14 The first comprehensive economic history of pre colonial Madagascar this study examines the island's role from 1750 to 1895 in the context of a burgeoning international economy and the rise of modern European imperialism This study reveals that the Merina of the Central Highlands attempted to found an island empire and through the exploitation of its human and natural resources build the economic and military might to challenge British and French pretensions in the region Ultimately the Merina failed due to imperial forced labour policies and natural disasters the nefarious consequences of which disease depopulation ethnic enmity have in traditional histories been imputed external capitalist and French colonial policies **Business, Race, and Politics in British India, c.1850-1960** Maria

Misra, 1999-04-29 This is a study of the political and economic activities of an important group of British businessmen in India between 1850 and 1960 Though denounced by Indian nationalists as the economic arm of the British Raj the firms of these Managing Agents seemed unassailable before the First World War However during the inter war period they rapidly lost their commanding position to both Indian and other foreign competitors Dr Misra argues that the failure of these firms was in part the consequence of their particular and ultimately self defeating attitudes towards business politics and race She casts new light on British colonial society in India and makes an important contribution to current debates on the nature of the British Empire and the causes of Britain's relative economic decline Gentlemanly Capitalism, Imperialism and Global History S. Akita, 2002-10-31 British imperial history can now be seen as a bridge to global history This study tries to renew the debate on British imperialism by combining Western and Asian historiography and constructing a new global history as an aid to the understanding of globalization in the late twentieth and twenty first centuries Part One takes a predominantly metropolitan view of the globalizing forces unleashed by British imperialism Part Two focuses on the international order of East Asia and its connection with gentlemanly capitalism *Money, Finance, and Empire, 1790-1960* R.F. Holland, A.N.

Porter, 2012-11-12 Scholars have recently begun to pay renewed attention to the economics of empire focusing in particular on the requirements of metropolitan Britain's economy and on the activities of imperial businesses Within this broad field financial questions not least the subject of investment overseas or the export of capital have long had a prominent place and have been equally affected by the development of new approaches The consensus as to the volume and direction of Britain's overseas investments is being vigorously challenged Technological advances have encouraged on a greatly enlarged scale the compilation and analysis of information about British investments and shareholdings abroad The gradual easing of restrictions on business records has increased facilities for the study especially of imperial and colonial banking Work on the financial policies of central governments is revealing much of interest to students of twentieth century colonial rule and decolonization This collection of essays brings together a selection of the latest research on these and other themes and for

comparative purposes includes examples of recent continental work

Understanding Business Vivek Suneja, 2000 A critical introduction to the workings of the market looking particularly at the diversity of market economies their successes and shortcomings Alternative approaches including Marxist and Keynesian are also discussed **Imperialism in the Modern World** William Bowman, Frank Chiteji, J. Megan Greene, 2016-11-03 Imperialism in the Modern World combines narrative primary and secondary sources and visual documents to examine global relations in the nineteenth and twentieth centuries The three co editors Professors Bowman Chiteji and Greene have taught for many years global history classes in a variety of institutions They wrote Imperialism in the Modern World to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history some readers use primary materials exclusively Some focus on secondary arguments This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper division levels The reader will allow show students how to read historical documents through a hands on demonstration in the introduction The book also incorporates images as visual documents Finally the book conceives of global history in the widest possible terms it contains pieces on political diplomatic economic and military history to be sure but it also has selections on technology medicine women the environment social changes and cultural patterns Other readers can not match this text s breadth because they are chronologically and thematically so extended Understanding Business: Markets Vivek Suneja, 2005-07-25 How do markets work This reader introduces the student to the workings of the market explaining both the reasons for its success

and its shortcomings Throughout the text encourages a critical approach demonstrating the diversity of market economies In particular it explores the social nature of market economies the range of approaches to the study of the market Marxist Austrian Keynesian and institutional economics are discussed as alternatives to the neo classical mainstream the differences between Anglo American European and Asian economic models the historical development of markets globalisation its extent and its impact the costs and the benefits of markets With chapters by Will Hutton John Gray and Eric Hobsbawm this reader provides an excellent introduction

Global Expansion Willie Thompson, 1999-10-20 In this clear and concise reassessment of British imperialism Willie Thompson examines the underlying social economic and political forces that facilitated expansion during the key period of 1870-1914 Relating colonial expansion to both domestic politics and international relations his book identifies the shifts in world economic and political relationships especially the challenge from an emergent German Reich as the driving forces behind the fresh burst of expansionist energy during the period Willie Thompson considers in detail the relations with the British state and various types of colony from the semi autonomous settlement colonies to wholly subordinated African territories and semi colonies such as China and the Ottoman Empire The impact of imperial ideology on British society and culture both official and popular and on political perceptions is explored as is the structure of international relations and tensions generated by this phase of imperialism
