From the transatlantic perspective, increasing differences in the economic policy and the potential rise of conflicts between Europe and the USA, for example in trade competition and health issues, are important. The current volume touches most but not all of these topics. It starts with the overview by Joseph Stiglitz on policy issues. Then

macroeconomics policy is discussed followed by the problem of an ageing society and European enlargement Differences between Europe and the USA are large in taxation and in the role of public finance The relative competitiveness of countries as well as of Europe will be decided by investments into new technologies and progression towards the Science Based Economy In the final section the role of economists in shaping the economic agenda and giving policy advice is discussed
