OECD Regional Development Studies Reaching Climate Neutrality for the Hamburg Economy by 2040

OECD,2024-01-26 This report shows what reaching climate neutrality by 2040 means for Hamburg businesses and identifies key actions they need to undertake *Handbook of Population and Family Economics* M.R. Rosenzweig,Oded

Stark,1997-04-23 Comprises 21 articles that survey areas of research in population and family economics *Economics and Climate Emergency* Barry Gills,Jamie Morgan,2022-08-22 This book explores a series of connected themes focused on the

role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal *Globalizations* [A Primer of Health Systems Economics](#) ,

Nature and Resources ,1990 *The Economics and Business of Sustainability* Peter N. Nemetz,2021-09-26 Given the emergence of sustainability as the defining issue of our time it is essential for university graduates and especially business and economics students to have a fundamental grasp of the key issues in this emerging multidisciplinary field of study Nemetz provides a comprehensive detailed overview of the interlinked economic and ecological concepts central to this new discipline Accompanying the introduction of the underlying theory is a broad array of real world supporting data from Asia Europe and North America This volume also features a chapter on the threat of emerging pandemics and their significance for the achievement of a truly sustainable world This book accentuates the value and importance of a strong sustainability approach in an age of climate change emergency It is an ideal companion for instructors and students of sustainability in business economics and related disciplines such as geography and political science [Indian Economy: Reforms and Development](#) Pradip Kumar Biswas,Panchanan Das,2019-08-09 The book presents a comprehensive study of the impact of policy reforms on output employment and productivity growth across sectors of India since 1991 It showcases varied responses from different sectors as they faced different degrees of policy interventions and challenges or opportunities as

regards markets technology and availability of skills and other complementary resources The book also discusses the contributions of the service sector on India's GDP and employment The book throws light on the phenomena of rising inequality and persistent poverty which continues to shadow and be a hallmark of post reform India despite high economic growth It underlines the failure of these reforms to bring about major change in social and economic organizations and institutions The book's contents stress on the criticality of addressing these issues as they have a serious potential of jeopardizing the country's ability to maintain high growth momentum With these pertinent topics the book would be of interest not only to the research community but also to policy makers and practitioners of various sectors addressed here

Climate Intervention National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Board on Atmospheric Sciences and Climate, Committee on Geoengineering Climate: Technical Evaluation and Discussion of Impacts, 2015-06-17 The signals are everywhere that our planet is experiencing significant climate change It is clear that we need to reduce the emissions of carbon dioxide and other greenhouse gases from our atmosphere if we want to avoid greatly increased risk of damage from climate change Aggressively pursuing a program of emissions abatement or mitigation will show results over a timescale of many decades How do we actively remove carbon dioxide from the atmosphere to make a bigger difference more quickly As one of a two book report this volume of Climate Intervention discusses CDR the carbon dioxide removal of greenhouse gas emissions from the atmosphere and sequestration of it in perpetuity Climate Intervention Carbon Dioxide Removal and Reliable Sequestration introduces possible CDR approaches and then discusses them in depth Land management practices such as low till agriculture reforestation and afforestation ocean iron fertilization and land and ocean based accelerated weathering could amplify the rates of processes that are already occurring as part of the natural carbon cycle Other CDR approaches such as bioenergy with carbon capture and sequestration direct air capture and sequestration and traditional carbon capture and sequestration seek to capture CO₂ from the atmosphere and dispose of it by pumping it underground at high pressure This book looks at the pros and cons of these options and estimates possible rates of removal and total amounts that might be removed via these methods With whatever portfolio of technologies the transition is achieved eliminating the carbon dioxide emissions from the global energy and transportation systems will pose an enormous technical economic and social challenge that will likely take decades of concerted effort to achieve Climate Intervention Carbon Dioxide Removal and Reliable Sequestration will help to better understand the potential cost and performance of CDR strategies to inform debate and decision making as we work to stabilize and reduce atmospheric concentrations of carbon dioxide

Nordic Stocktake - Pathways to Climate Neutrality Lind, Andreas, Norn, Peter Andreas, Sørensen, Tobias Johan, Tynkkynen, Oras, 2023 Available online <https://pub.norden.org/temanord2023/545> The UNFCCC Global Stocktake will be conducted during COP28 in December 2023 The Nordic Stocktake report is intended as a regional tool to support the Global Stocktake process and spur to further climate action both within the Nordics and beyond

The Nordic region needs to increase the pace of the green transition if we are to lead by example The report is a stocktake of GHG emissions in the Nordic countries and a description and assessment of the different national pathways towards climate neutrality in the Nordic region Many of the challenges on the path towards climate neutrality are not unique to the Nordic countries and solving these in the Nordic region in countries well positioned to do so would prove valuable for global climate action The report highlights common challenges across the Nordic countries and proposes opportunities for further cross Nordic collaboration
