Solanum tuberosum L is grown in over 100 countries throughout the world As a staple food potato is the fourth most
important crop after rice wheat and maize and has historically contributed to food and nutrition security in the world Global
interest in potato increased recently as world food prices soared threatening the global food security and stability Unlike

importance the 29 chapters in the edited book address the issues of sustainable potato production This book begins with an
introduction on sustainable potato production and global food security and then presents eight case studies selected globally
and covering different issues relevant to sustainable potato production in both developed and developing countries Soil
