

Mystery of the Maya Collapse

- For over a decade, archaeologists have been trying to unlock the mystery surrounding the collapse of the Ancient Maya civilization.
- Did human-induced sociopolitical or ecological change cause the collapse of this highly advanced Mesoamerican civilization, or could natural climate variability of the Yucatan Peninsula have contributed to the collapse?
- Paleoclimatologists are studying the climatic history of this region to provide archaeologists with the climate context in which the Maya civilization evolved, flourished and ultimately collapsed.

effect of postcolonial theorizing will be on the practice of archaeology in the twenty first century **Crisis of Islamic Civilization** Ali A. Allawi, 2009-04-28 Islam as a religion is central to the lives of over a billion people but its outer expression as a distinctive civilization has been undergoing a monumental crisis Buffeted by powerful adverse currents Islamic civilization today is a shadow of its former self The most disturbing and possibly fatal of these currents the imperial expansion of the West into Muslim lands and the blast of modernity that accompanied it are now compounded by a third giant wave globalization These forces have increasingly tested Islam and Islamic civilization for validity adaptability and the ability to hold on to the loyalty of Muslims says Ali A Allawi in his provocative new book While the faith has proved resilient in the face of these challenges other aspects of Islamic civilization have atrophied or died Allawi contends and Islamic civilization is now undergoing its last crisis The book explores how Islamic civilization began to unravel under colonial rule as its institutions laws and economies were often replaced by inadequate modern equivalents Allawi also examines the backlash expressed through the increasing religiosity of Muslim societies and the spectacular rise of political Islam and its terrorist offshoots Assessing the status of each of the building blocks of Islamic civilization the author concludes that Islamic civilization cannot survive without the vital spirituality that underpinned it in the past He identifies a key set of principles for moving forward principles that will surprise some and anger others yet clearly must be considered *The Aztec and Mayan Worlds* Fiona Macdonald, 2009-01-15 Presents a general history of the cultural and social aspects of the ancient Maya and Aztec empires up to the arrival of Spanish conquerors in a book that also provides readers with instructions for creating such related craft projects as a feather fan a mosaic mask a codex and a miniature pyramid temple *The Historical Evolution of World-Systems* C. Chase-Dunn, E. Anderson, 2005-02-18 The rise and decline of great powers remains a fascinating topic of vigorous debate This book brings together leading scholars to explore the historical evolution of world systems through examining the ebb and flow of great powers over time with particular emphasis on early time periods The book advances understanding of the regularities in the dynamics of empire and the expansion of political social and economic interaction networks from the Bronze Age forward The authors analyze the expansion and contraction of cross cultural trade networks and systems of competing and allying political groupings In premodern times theses ranged from small local trading networks even the very small ones of hunting gathering peoples to the vast Mongol world system Within such systems there is usually one or a very few hegemonic powers How they achieve dominance and how transitions lead to systems change are important topics particularly at a time when the United States position is in flux The chapters in this book review several recent approaches and present a wealth of new findings A Theocratic Yehud? Jeremiah W. Cataldo, 2009-03-01 Offers a fresh reevaluation of Yehud in the Persian period addressing in particular the dynamics of its relationship to the Persian imperial government *Gordon R.
