## Fall Of The House Of Wppss:

**The Organic Machine** Richard White, 2011-04-01 The Hill and Wang Critical Issues Series concise affordable works on pivotal topics in American history society and politics In this pioneering study White explores the relationship between the natural history of the Columbia River and the human history of the Pacific Northwest for both whites and Native Americans He concentrates on what brings humans and the river together not only the physical space of the region but also and primarily energy and work For working with the river has been central to Pacific Northwesterners competing ways of life It is in this way that White comes to view the Columbia River as an organic machine with conflicting human and natural claims and to show that whatever separation exists between humans and nature exists to be crossed **Engineering Project Management** Louis Goodman, 2019-03-14 This book presents IPQMS Integrated Planning and Quality Management System as a powerful management methodology This system ensures cost effectiveness as well as quality in the constructed project environmental cleanups and other sectors providing an integrative force for essential teamwork in industry and government This book contains business and engineering case studies illustrating a principle issue or approach in making a decision Each case study examines the spectrum of a particular project demonstrating the interrelationships among policy makers planners designers implementers and managers in creating a project **Saving All the Parts** Rocky Barker, 2013-04-10 **Saving All the Parts** is a journalist s exploration of the intertwining of endangered species protection and the economic future of resource dependent communities those with local economies based on fishing logging ranching mining and other resource intensive industries Rocky Barker presents an insightful overview of current endangered species controversies and a comprehensive look at the wide ranging implications of human activities The book analyzes trends in natural resource management land use planning and economic development that can lead to a future where economic activity can be sustained without the loss of essential natural values Throughout Barker provides a thorough and balanced analysis of both the ecological and economic forces that affect the lives and livelihoods of the nation s inhabitants both human and animal *The Urban Lawyer*, 1986 The national quarterly on local government law *The Wired Northwest* Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region s first century of electrification Paul Hirt s new study reveals how the region s citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies

like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage The Wired Northwest helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future *The Atomic West* Bruce William Hevly, John M Findlay, 1998 The Manhattan Project transformed the entire country in myriad ways but it did not affect each region in the same way Atomic West tells the story of how the U S government acting on an enduring perception of the American West as an empty place located a disproportionate number of nuclear facilities in the western states especially the ones most likely to spread pollution Maps *Congressional Record* United States. Congress, 1994 Energy Review , 1986 *Business and Economic History* Business History Conference, 1990 **Review of Industrial Organization** , 1992 *Oregon Historical Quarterly* Oregon Historical Society, 2009 Nuclear Power and Ratepayer Protest Wayne H. Sugai, 2019-03-13 In early 1982 the Washington Public Power Supply System WPPSS terminated two nuclear projects triggering an episode of mass ratepayer insurgency throughout the state In this survey of the crisis Dr Sugai analyzes the political and economic conditions that precipitated the protest and examines citizen opposition to the WPPSS nuclear venture b **The Environment in the Twentieth-century American West** Tomas Jaehn, 1990 *Annual Review of Energy and the Environment* , 1991 Provides abstracts and full text review articles on technical and policy topics dealing with energy and the environment
