On a clear quiet day in April 1961 two schoolgirls in Russia s Saratov region looked into the sky and saw a huge glowing ball hurtling towards the earth Five tons of charred steel hit the ground bounced then fell again leaving a huge smoking crater in the plains Two kilometers away a peasant farmer and her daughter were frozen to the spot staring at a bright orange figure with a large round white head and a huge cape striding towards them The terrified farmer and her daughter turned to run Then the figure cried out not in a space language but native Russian Don t be afraid I am a Soviet like you They moved closer to him and saw instead of a alien invader or a spy a man in an orange jumpsuit dragging a cumbersome parachute He pushed back the visor on his white helmet and they could see the red letters CCCP stenciled on the front Could it be that you have just descended from space asked the farmer The man stood only 5 2 and had the broad plain features of a typical Muscovite Yes I have he said flashing his winning smile a smile soon to be famous throughout the entire world He said I must find a telephone to Moscow The man had just completed a 102 minute orbit of the Earth His name was Yuri Alexeyevich Gagarin He was twenty seven years old and he had changed Earth s history forever Reds Win Running Lead in Race to Control Space screamed a headline Since the tiny Sputnik had orbited Earth four years earlier the United States and the Soviet Union had been locked in a battle for more advanced technologies Both nations had immense technological resources The United States had imported several prominent German scientists during Project Paperclip clearing their records of Nazi involvement in exchange for their knowledge of rocketry The Soviet Union had the legacy of Konstantin Tsiolkovsky the eccentric eccentric pioneer of astronautics and the de facto leadership of visionary engineer Sergei Korolev as well was a powerful thirst to prove themselves Each nation was determined to be the first in space The Soviet Union s early successes in the Space Race were an undeniable challenge to the United States scientific and political authority Yuri was born March 9 1934 on a collective farm 100 miles outside Moscow His mother Anna worked the fields and his father Alexei was a carpenter Anna was well educated and kept many books in the house For the early years on the farm life was calm and scheduled Family

members recall Yuri as a mischievous happy child Then the Nazis invaded the Soviet Union and life was thrown into chaos German officers occupied their home and sent Yuri s brother Valentin and his sister Zoya to slave labour camps in Poland Yuri his parents and his younger brother Boris lived in a tiny mud hut for 21 months the remainder of the German occupation Alexei Leonov a fellow cosmonaut and first man to walk in space recalled this time as the formative years in Yuri s life During the war a Soviet aircraft was shot down near the village Yuri and the other village children fed the pilots and kept them hidden from the Nazis until they could be rescued It was then that Yuri knew that he wanted to be a pilot In 1946 when he was 13 and the war was over Yuri s siblings returned Their father moved the family home plank by plank to the nearby town Gzhatsk Yuri joined his school s aviation club and learned to fly light aircraft His favorite subjects were physics and math and he had a smile that all the girls loved

**Young Adult Science Fiction** C. W. Sullivan III, 1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications machines and gadgetry When authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need The result was science fiction written especially for young adults While critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value Science fiction inspired many young adults to study science and engineering and helped foster technological innovation At the same time these works also explored cultural and social concerns more commonly associated with serious literature Nor was young adult science fiction a peculiarly American phenomenon authors in other countries likewise wrote science fiction for young adult readers This book examines young adult science fiction in the U S and several other countries and explores issues central to the genre The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development Included are discussions of science fiction for young adults in the U S and in Canada Great Britain Germany and Australia These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present The second section of the book considers topics of special interest to young adult science fiction Some of the chapters look at particular forms and expressions of science fiction such as films

and comic books Others treat particular topics such as the portrayal of women in Robert Heinlein s works and representations of war in young adult science fiction Yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies
