Between the Pigeonholes Alison Falby, 2020-12-15 Aldous Huxley described Gerald Heard as that rare being a learned man who made his mental home on the vacant spaces between the pigeonholes Heard's off beat interests made him a cultural and intellectual pioneer on both sides of the Atlantic in the middle decades of the twentieth century Despite accolades from such figures as E M Forster who characterized him as one of the most penetrating minds in England and Christopher Isherwood who described him upon his death as one of the few great magic mythmakers and revealers of life's wonder Heard is largely unknown today Between the Pigeonholes is the first published full length study of Gerald Heard Alison Falby examines Heard's ideas and contexts in interwar Britain and postwar America demonstrating his significance in several important twentieth century movements These movements include popular science and psychology psychical research Eastern spirituality pacifism cooperativism and Californian counter culture All of Heard's involvements expressed his desire to convey religious ideas in the modern languages of biological social and physical science Falby also traces Heard's shifting political leanings from left liberal in the early 1930s to libertarian in the early 1960s She finds that his modernist theological approach conventionally associated with liberal religion and politics provided spiritual fodder for those on both

the Left and the Right Isherwood and W H Auden on the one hand and Clare Boothe Luce and Spiritual Mobilization on the other Using Heard as a prism through which to examine popular ideas Falby shows that the twentieth century contained much political and religious heterogeneity This heterogeneity illustrates the diverse and overlapping roots of both liberal religion and conservative politics in the twenty first century

**Metaphilosophy** Nicholas Rescher, 2014-10-23 The definitive mission of metaphilosophy is to facilitate an understanding of how philosophy works the aim of the enterprise the instrumental and procedural resources for its work and the prospect of its success Nicholas Rescher unites two facets of metaphilosophy to show that historical perspective and forward thinking normative or systematic metaphilosophy cannot be independent of one another The descriptive or historical metaphilosophy provides an account of what has been thought regarding the conduct of philosophical inquiry and the prescriptive or normative metaphilosophy which deliberates about what is to be thought regarding the conduct of philosophizing Rescher argues that metaphilosophy forms a part of philosophy itself This is a unique feature of the discipline since the philosophy of biology is not a part of biology and the philosophy of mathematics is not a part of mathematics Ultimately the salient features of philosophizing in general including the inherently controversial and discordant nature of philosophical doctrines are also bound to afflict metaphilosophy Thus only by a careful analysis of the central issues can a plausible view of the enterprise be developed Metaphilosophy Philosophy in Philosophical Perspective challenges the static compartmentalized view of metaphilosophy providing insight for scholars and students of all areas of philosophy
