Falling Out By Cohen Charles:

Strife in the Sanctuary Phil Zuckerman, 2000-01-01 For more than forty years there was a single synagogue in the quiet town of Williamette Oregon But then disagreements over gender roles homosexuality Israeli politics and other issues tore the synagogue in two Where there was once one Jewish community under one roof there are now two hostile congregations_ one Reconstructionist one Orthodox_ across the street from one another Through a year as a participant in both congregations and in depth interviews Zuckerman tells a mesmerizing story of this religious schism Strife in the Sanctuary then contemplates why religious groups split apart and how religious symbols come to mean different things to different groups The first book length study of a single congregation breaking in two Strife in the Sanctuary provides a welcome ethnographic study for sociologists of religion Plus its moving story makes it an excellent read for undergraduate classes or anyone interested in religious divisions

University of Pittsburgh,Western University of Pennsylvania,1921 *The Recombinant University* Doogab Yi,2015-03-23 The advent of recombinant DNA technology in the 1970s was a key moment in the history of both biotechnology and the commercialization of academic research Doogab Yi s *The Recombinant University* draws us deeply into the academic community in the San Francisco Bay Area where the technology was developed and adopted as the first major commercial technology for genetic engineering In doing so it reveals how research patronage market forces and legal developments from

the late 1960s through the early 1980s influenced the evolution of the technology and reshaped the moral and scientific life of biomedical researchers Bay Area scientists university administrators and government officials were fascinated by and increasingly engaged in the economic and political opportunities associated with the privatization of academic research Yi uncovers how the attempts made by Stanford scientists and administrators to demonstrate the relevance of academic research were increasingly mediated by capitalistic conceptions of knowledge medical innovation and the public interest Their interventions resulted in legal shifts and moral realignments that encouraged the privatization of academic research for public benefit The Recombinant University brings to life the hybrid origin story of biotechnology and the ways the academic culture of science has changed in tandem with the early commercialization of recombinant DNA technology **Register** Cornell University,1922 Reports of Proceedings of the City Council of Boston for the Year ...
