Computer Vision - ECCV 2004 Tomas Pajdla, Jiri Matas, 2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer vision Following a very successful ECCV 2002 the response to our call for papers was almost equally strong 555 papers were submitted We accepted 41 papers for oral and 149 papers for poster presentation Several innovations were introduced into the review process First the number of program committee members was increased to reduce their review load We managed to assign to program committee members no more than 12 papers Second we adopted a paper ranking system Program committee members were asked to rank all the papers assigned to them even those that were reviewed by additional reviewers Third we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers Fourth their reports their reviews and their responses were made available to the authors as well as to the program committee members Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not reflected in the final decision Finally we reduced the length of reviewed papers from 15 to 12 pages

The preparation of ECCV 2004 went smoothly thanks to the efforts of the organizing committee the area chairs the program committee and the reviewers We are indebted to Anders Heyden Mads Nielsen and Henrik J Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST TSI who kindly provided his GestRFIA conference software We thank Jan Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague Handbook of Image Engineering Yu-Jin Zhang, 2021-01-04 Image techniques have been developed and implemented for various purposes and image engineering IE is a rapidly evolving integrated discipline comprising the study of all the different branches of image techniques and encompassing mathematics physics biology physiology psychology electrical engineering computer science and automation Advances in the field are also closely related to the development of telecommunications biomedical engineering remote sensing surveying and mapping as well as document processing and industrial applications IE involves three related and partially overlapping groups of image techniques image processing IP in its narrow sense image analysis IA and image understanding IU and the integration of these three groups makes the discipline of image engineering an important part of the modern information era This is the first handbook on image engineering and provides a well structured comprehensive overview of this new discipline It also offers detailed information on the various image techniques It is a valuable reference
