Morton, 1999-08-28 At present much of political science consists of a large body of formal mathematical work that remains largely unexplored empirically and an expanding use of sophisticated statistical techniques While there are examples of noteworthy efforts to bridge the gap between these there is still a need for much more cooperative work between formal theorists and empirical researchers in the discipline This book explores how empirical analysis has can and should be used to evaluate formal models

in political science The book is intended to be a guide for active and future political scientists who are confronting the issues of empirical analysis with formal models in their work and as a basis for a needed dialogue between empirical and formal theoretical researchers in political science These developments if combined are potentially a basis for a new revolution in political science Content Area Literacy John E. Epistemics of Development Economics Kofi Kissi Dompere, Manzur Ejaz, 1995-08-22 The effective use of development economic theories in practice is limited the authors contend by the lack of explicit criterion for judging their scientific content The directional progress of critical research and teaching is also constrained by this deficiency This study advances a meta theory designed to assist in evaluating the scientific validity of theories in economic development and how these theories can be improved to assist social practice Using this model the study then examines existing theories dividing them into explanatory and prescriptive theories The explanatory theories include the stage based theories of Marx Schumpeter and Rostow and factor based theories including capital based human capital based and technology based theories The prescriptive theories include explanatory theory based prescriptions interventionist prescriptive theories and theories of economic planning In conclusion the authors contend that modern analysis of development economics is plagued with logical ills misleading notions and a weak theoretical structure that lacks scientific appeal Most of the theories except for those of Marx and Schumpeter neglect an analysis of the mechanism of change

Old Testament Cosmology and Divine Accommodation John W. Hilber, 2020-04-03 In order to reconcile the discrepancies between ancient and modern cosmology confessional scholars from every viewpoint on the interpretation of the early chapters of Genesis agree that God accommodated language to finite human understanding But in the history of interpretation no consensus has emerged regarding what accommodation entails at the linguistic level More precise consideration of how the ancient cognitive environment functions in the informative intention of the divine and human authors is necessary Not only does relevance theory validate interpretative options that are inherently most probable within the primary communication situation but the application of relevance theory can also help disentangle the complexities of dual authorship inherent in any model of accommodation The results also make a salutary contribution to the theological reading of Scripture
