Familiar Aliens:

Familiar Aliens Mark Caldwell Walker, 2005-11-23 They are like us but they are different not in an incompatible way but in ways that defy the assumptions humans in most world cultures take for granted Their village technology and culture are almost aboriginal but their language is intricate and efficient The people of the planet Nenmar on the other side of the galaxy from Earth possess what many humans strive for a deep self assurance and corresponding acceptance of others The offspring of a Nenmaran mother and human father through a natural yearning to know their family history find themselves immersed in the things of Earth Of all their questions the main one is what will happen when Nenmaran openness meets human xenophobia

Aliens and Englishness in Elizabethan Drama Lloyd Edward Kermode, 2009-03-19 Covering a wide variety of plays from 1550 1600 including Shakespeare's second tetralogy this book explores moral historical and comic plays as contributions to Elizabethan debates on Anglo foreign relations in England The economic social religious and political issues that arose from inter British contact and Continental immigration into England are reinvented and rehearsed on the public stage Kermode uncovers two broad alien stages in the drama distinctive but overlapping processes by which the alien was used to posit ideas and ideals of Englishness Many studies of English national identity pit Englishness against the alien other so that the native self and the alien settle into antithetical positions In contrast *Aliens and Englishness* reads a body of plays that represent Englishness as a state of ideological invented superiority paradoxically stable in its constant changeability and brought into being by incorporating and eventually accepting and even celebrating rather than rejecting the alien

Abduction: Human Encounters with Aliens Mack, 2009-12-15 A Harvard psychiatrist the author of *A Prince of Our Disorder* presents accounts of alien abduction taken from the more than sixty cases he has investigated and examines the implications for our identity as a species These mesmerizing and thought provoking stories of alien encounters from a Harvard professor take you through actual case studies of people from all walks of life and ages who have had challenging sometimes disturbing and in every case life changing experiences of alien abduction John Mack explores evidence of nonhuman intelligence like an attorney preparing for the trial of the century interviewing witnesses examining physical evidence consulting with experts in related fields constantly questioning his own assumptions As a story of one man's determination to bear witness to cosmic mysteries with extraordinary implications for the human future *Abduction* is bound to become a modern classic Keith Thompson author of *Angels and Aliens* Aliens George Edgar Slusser, 1987 How and when does there come to be an anthropology of the alien This set of essays written for the eighth J Lloyd Eaton Conference on Fantasy and Science Fiction is concerned with the significance of that question Anthropology is the science that must designate the alien if it is to redefine a place for itself in the universe according to the Introduction The idea of the alien is not new In the Renaissance Montaigne's purpose in describing an alien encounter was excorporation man kind was the savage because the artificial devices of nature controlled him Shakespeare's version of the alien encounter was in

corporation his character of Caliban is brought to the artificial political world of man and incorporated into the body politic. The essays in this volume show in their general orientation that the tribe of Shakespeare still in literary studies at least outnumbers that of Montaigne. These essays show the interrelation of the excorporating possibilities to the internal soundings of the alien encounter within the human mind and form. This book is divided into three parts. Searchings: The Quest for the Alien includes 'The Aliens in Our Mind' by Larry Niven, 'Effing the Ineffable' by Gregory Benford, 'Border Patrols' by Michael Beehler, 'Alien Aliens' by Pascal Ducommun and 'Metamorphoses of the Dragon' by George E. Slusser. Sightings: The Aliens among Us includes 'Discriminating among Friends' by John Huntington, 'Sex Superman' by Joseph D. Miller, 'Cowboys and Telepaths' by Eric S. Rabkin, 'Robots' by Noel Perrin, 'Aliens in the Supermarket' by George R. Guffey and 'Aliens R U?' by Zoe Sofia. Soundings: Man as the Alien includes 'H. G. Wells' by John R. Reed, 'Inspiration and Possession' by Clayton Koelb, 'Cybernauts in Cyberspace' by David Porush, 'The Human Alien' by Leighton Brett Cooke, 'From Astarte to Barbie' by Frank McConnell and 'An Indication of Monsters' by Colin Greenland.

Doing Animal Studies with Androids, Aliens, and Ghosts David P. Rando, 2023-04-06 Exploring what can be learnt when literary critics in the field of animal studies temporarily direct attention away from representations of nonhuman animals in literature and towards liminal figures like androids, aliens and ghosts, this book examines the boundaries of humanness. Simultaneously it encourages the reader both to see nonhuman animals afresh and to reimagine the terms of our relationships with them. Examining imaginative texts by writers such as Octavia Butler, Philip K. Dick, Kazuo Ishiguro, Jeanette Winterson and J. M. Coetzee, this book looks at depictions of androids that redefine traditional humanist qualities such as hope and uniqueness. It examines alien visions that unmask the racist and heteronormative roots of speciesism. And it unpacks examples of ghosts and spirits who offer posthumous visions of having been human that decenter anthropocentrism. In doing so, it leaves open the potential for better relationships and futures with nonhuman animals.

Parental Care: Evolution, Mechanisms, And Adaptive Significance, 1996-11-18 Advances in the Study of Behavior presents its first thematic volume focusing on the physiological and behavioral mechanisms underlying parental care. The book discusses parental care both within and across taxa, with coverage of invertebrates and early vertebrates: fishes, amphibians, reptiles, mammals, birds, and nonhuman primates. A running theme throughout the chapters shows that parental care is anchored to the ecology, reproductive physiology, and embryonic development of a species. Coverage also includes mechanisms of parental care, including analysis of the stimuli that parents respond to and how parental care is initiated, maintained, and terminated. Individual differences within species are also explored, examining stable differences in maternal style, how they arise, and the consequences for both mother and infant.

Aliens in America Jodi Dean, 1998 Discusses the social and political implications of widespread belief in unidentified flying objects, extraterrestrials, and government cover-ups and considers what they reveal in a culture of mass media and conflicting evidence.

From Empire to Nation State Yan Sun,2020-09-17 A historical political perspective on China s contemporary ethnic strife caused by its incomplete transition from empire to nation state [Alien Structure](#) Matti Eklund,2024-06-19 What sorts of alien languages can there be And might reality be such that some alien language represents reality better than familiar languages do Alien languages are here languages that use different kinds of semantic tools than any familiar languages use The question of the existence of alien languages is interesting in itself what kinds of languages are possible But attending to the issue of alien languages also problematizes the relationship between language and reality and highlights the possibility that reality could have a fundamentally different structure than we otherwise take it to have Despite the foundational significance of these questions they have received virtually no explicit attention in the literature But the book brings up and criticizes existing contemporary work that promises to be at least indirectly relevant A main claim of the book is that alien languages are possible and that we should be alert to the possibility that reality has alien structure and is best described by an alien language The book also raises other possibilities regarding this debate Maybe we should not say that the world has either kind of structure but can be equally well described using either kind of languages
