Phenomenology and the Transcendental Sara Heinämaa, Mirja Hartimo, Timo Miettinen, 2014-04-03 The aim of this volume is to offer an updated account of the transcendental character of phenomenology The main question concerns the sense and relevance of transcendental philosophy today What can such philosophy contribute to contemporary inquiries and debates after the many reasoned attacks against its idealistic aprioristic absolutist and universalistic tendencies voiced most vigorously by late 20th century postmodern thinkers as well as attacks against its apparently circular arguments and suspicious metaphysics launched by many analytic philosophers Contributors also aim to clarify the relations of transcendental phenomenology to other post-Kantian philosophies most importantly to pragmatism and Wittgenstein's philosophical investigations Finally the volume offers a set of reflections on the meaning of post-transcendental phenomenology

The Concept of Mind Gilbert Ryle, 2009-05-29 First published in 1949 Gilbert Ryle's *The Concept of Mind* is one of the classics of twentieth century philosophy Described by Ryle as a sustained piece of analytical hatchet work on Cartesian dualism *The Concept of Mind* is a radical and controversial attempt to jettison once and for all what Ryle called the ghost in the machine Descartes argument that mind and body are two separate entities This sixtieth anniversary edition includes a substantial commentary by Julia Tanney and is essential reading for new readers interested not only in the history of analytic philosophy but in its power to challenge major currents in philosophy of mind and language today

Inside Narnia Devin Brown, 2005-09 Insightful and thorough *Inside Narnia* will dig deeper into Lewis's magical world to reveal biblical truths that often go uncovered

The Later Works, 1925-1953 John Dewey, 1981 John Dewey's *Experience and Nature* has been considered the fullest expression of his mature philosophy since its eagerly awaited publication in 1925 Irwin Edman wrote at that time that with monumental care detail and completeness Professor

Dewey has in this volume revealed the metaphysical heart that beats its unvarying alert tempo through all his writings whatever their explicit themes In his introduction to this volume Sidney Hook points out that Dewey's *Experience and Nature* is both the most suggestive and most difficult of his writings The meticulously edited text published here as the first volume in the series *The Later Works of John Dewey 1925-1953* spans that entire period in Dewey's thought by including two important and previously unpublished documents from the book's history Dewey's unfinished new introduction written between 1947 and 1949 edited by the late Joseph Ratner and Dewey's unedited final draft of that introduction written the year before his death In the intervening years Dewey realized the impossibility of making his use of the word experience understood He wrote in his 1951 draft for a new introduction Were I to write or rewrite *Experience and Nature* today I would entitle the book *Culture and Nature* and the treatment of specific subject matters would be correspondingly modified I would abandon the term experience because of my growing realization that the historical obstacles which prevented understanding of my use of experience are for all practical purposes insurmountable I would substitute the term culture because with its meanings as now firmly established it can fully and freely carry my philosophy of experience

How We Think John Dewey, 2015-12-25 No words are oftener on our lips than thinking and thought So profuse and varied indeed is our use of these words that it is not easy to define just what we mean by them The aim of this chapter is to find a single consistent meaning Assistance may be had by considering some typical ways in which the terms are employed In the first place thought is used broadly not to say loosely Everything that comes to mind that goes through our heads is called a thought To think of a thing is just to be conscious of it in any way whatsoever Second the term is restricted by excluding whatever is directly presented we think or think of only such things as we do not directly see hear smell or taste Then third the meaning is further limited to beliefs that rest upon some kind of evidence or testimony Of this third type two kinds or rather two degrees must be discriminated In some cases a belief is accepted with slight or almost no attempt to state the grounds that support it In other cases the ground or basis for a belief is deliberately sought and its adequacy to support the belief examined This process is called reflective thought it alone is truly educative in value and it forms accordingly the principal subject of this volume We shall now briefly describe each of the four senses Chance and idle thinking I In its loosest sense thinking signifies everything that as we say is in our heads or that goes through our minds He who offers a penny for your thoughts does not expect to drive any great bargain In calling the objects of his demand thoughts he does not intend to ascribe to them dignity consecutiveness or truth Any idle fancy trivial recollection or flitting impression will satisfy his demand Daydreaming building of castles in the air that loose flux of casual and disconnected material that floats through our minds in relaxed moments are in this random sense thinking More of our

waking life than we should care to admit even to ourselves is likely to be whiled away in this inconsequential trifling with idle fancy and unsubstantial hope
