Handbook of Interpersonal Commitment and Relationship Stability Jeffrey M. Adams, Warren H. Jones, 1999-09-30 A fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future As an acquaintanceship turns into a friendship for example both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent diverse and intimate over time This expectation is perhaps most apparent in romantically involved couples who through a variety of verbal and symbolic means make explicit pledges to a long lasting relationship In either case it is clear that these relationships represent something valuable to the individuals involved and are pursued with great enthusiasm Virtually all close relationships are formed within the context of mutually rewarding interactions and or strong physical attraction between partners Friends and romantically

involved couples alike are drawn to one another because of similarity of attitudes interests and personality and quite simply because they enjoy one another's company This enjoyment coupled with the novelty that characterizes new relationships almost makes the continuation of the relationship a foregone conclusion As relationships progress however their novelty fades conflicts may arise between partners negative life events may occur and the satisfaction that previously characterized the relationships may diminish

Black Market Britain Mark Roodhouse, 2013-03-21 Britain's underground economy flourished during the 1940s and early 1950s thanks to rationing and price control producers traders and professional criminals helped consumers to get a little extra on the side from under the counter or off the back of a lorry Yet widespread evasion of regulations designed to ensure fair shares for all did not undermine the austerity policies that characterised these years and its vital role in securing compliance with economic regulation In Black Market Britain Mark Roodhouse argues that Britons showed self

restraint in their illegal dealings The means motives and opportunities for evasion were not lacking The shortages were real regulations were not watertight and enforcement was haphazard Fairness not patriotism and respect for the law is the key to understanding this self restraint By invoking popular notions of a fair price a fair profit and a fair share government rhetoric limited black marketeering as would be evaders had to justify their offences both to themselves and others Black Market Britain underlines the importance of fairness to those seeking a richer understanding of economic life in modern Britain
