Smith and P W Moore **Continuity and Change Among Canadian Mennonite Brethren** Peter M. Hamm, 1987-03-09
 More than 450 years after their birth in the Anabaptist movement 125 years after their secession from Russian Mennonitism and 60 years after their immigration to Canada the Mennonite Brethren exhibit specific and measurable signs of sectarian viability and religious vitality To explain the persistence of the sect Hamm analyses the process of sacralization within the Canadian Mennonite Brethren Church which safeguards identity a system of meaning or a definition of reality and the process of secularization which erodes boundaries dislodges stable structures and destroys identity It is an oversimplification the author argues to insist that the factors of continuity ethical and cognitive norms family solidarity ethnicity worship evangelism community and church structures and service agencies are solely integrative and that the factors of change urbanization education occupational change and economic affluence are solely disruptive Instead a complex dialectic between the two processes is at work that prevents restrictive rigidity within the sect and excessive accommodation to the host society According to the author this analysis of the Canadian Mennonite Brethren becomes a case study to test the utility of an identity theory of religion which hinges on the integration differentiation dialectic It is at the same time a serious self study in religious sociology by which the author seeks to gain a better understanding of the processes of growth and decline of continuity and change and of the ongoing tension resulting from the religious movement's confrontation with society

Families and Religion Christel Gärtner, Linda Hennig, Olaf Müller, 2025-03-20 This comparative study examines the transmission of religion in families in Germany Italy Hungary Finland and Canada The authors rely on the widely shared argument that religious change can primarily be understood as an intergenerational process Based on a mixed methods design the book investigates the question of how when exactly and under what conditions the following generations become less religious than the previous ones From the perspective of familial and historical generations the authors examine the significance of religious socialization for the transmission of non religious worldviews affiliation practice and identity According to a central finding religious change takes place primarily in the phase of adolescence against the background of the respective social context
