Selling the Future Ryan Moran, 2024-01-15 In Selling the Future Ryan Moran explains how the life insurance industry in Japan exploited its association with mutuality and community to commodify and govern lives Covering the years from the start of the industry in 1881 through the end of World War II Moran describes insurance companies and government officials working together to create a picture of the future as precarious and dangerous Since it was impossible for individual consumers to deal with every contingency on their own insurance industry administrators argued that their usage of statistical data enabled them to chart the predictable future for the aggregate Through insurance companies and the state thus offered consumers a means to a perfectible future in an era filled with repeated crises Life

insurance functioned as an important modernist technology within Japan and its colonies to instantiate expectations for responsibility to reconfigure meanings of mutuality and to normalize new social formations such as the nuclear family as essential to life. Life insurance thus offers an important vehicle for examining the confluence of modes of mobilizing and organizing bodies, the expropriation of financial resources and the action of disciplining workers into a capitalist system.

Asset Building and Low Income Families Signe-Mary McKernan, 2008-10-15 Low income families have scant savings to cushion a job loss or illness and can find economic mobility impossible without funds to invest in education, homes or businesses. And though a lack of resources leaves such families vulnerable, income support programs are often closed to those with a bit of savings or even a car. Considering welfare to work reforms, the increasingly advanced skill demands of the American workforce and our stretched Social Security system, such an approach is inadequate to lift families out of poverty. Asset based policies allowing or even helping low income families build wealth are an increasingly popular strategy to facilitate financial stability.
