Families And The Future Children In Society Series:

The Future of Families to 2030 OECD,2011-12-22 This report explores likely future changes in family and household structures in OECD countries identifies the main forces shaping the family landscape to 2030 discusses the longer term challenges and suggests policy options for managing the challenges

The Future of the Family Daniel Patrick Moynihan,Timothy Smeeding, Lee Rainwater,2004-10-06 High rates of divorce single parenthood and nonmarital cohabitation are forcing Americans to reexamine their definition of family This evolving social reality requires public policy to evolve as well The Future of the Family brings together the top scholars of family policy headlined by editors Lee Rainwater Tim Smeeding and in his last published work the late Senator Daniel Patrick Moynihan to take stock of the state of the family in the United States today and address the ways in which public policy affects the family and vice versa The volume opens with an assessment of new forms of family discussing how reduced family income and lower parental involvement can disadvantage children who grow up outside of two parent households The book then presents three vastly dissimilar recommendations each representing a different segment of the political spectrum for how family policy should adapt to these changes Child psychologist Wade Horn argues the case of political conservatives that healthy two parent families are the best way to raise children and therefore should be actively promoted by government initiatives Conversely economist Nancy Folbre argues that government's role lies not in prescribing family arrangements but rather in recognizing and fostering the importance of caregivers within all families conventional or otherwise Will Marshall and Isabel Sawhill borrow policy prescriptions from the left and the right arguing for more initiatives that demand personal responsibility from parents as well as for an increase in workplace flexibility and the establishment of universal preschool programs The book follows with commentary by leading policy analysts Samuel Preston Frank Furstenberg Jr and Irwin Garfinkel on the merits of the conservative and liberal arguments Each suggests that marriage promotion alone is not enough to ensure a happy healthy and prosperous future for American children who are caught up in the vortex of family change They agree that government investments in children however can promote superior developmental outcomes and even potentially encourage traditional families by enlarging the pool of marriageable individuals for the next generation No government action can reverse trends in family formation or return America to the historic nuclear family model But understanding social change is an essential step in fashioning effective policy for today's families With authoritative insight The Future of the Family broadens and updates our knowledge of how public policy and demography shape one another

insurance industry in Japan exploited its association with mutuality and community to commodify and govern lives Covering the years from the start of the industry in 1881 through the end of World War II Moran describes insurance companies and government officials working together to create a picture of the future as precarious and dangerous Since it was impossible for individual consumers to deal with every contingency on their own insurance industry administrators argued that their usage of statistical data enabled them to chart the predictable future for the aggregate Through insurance companies and the state thus offered consumers a means to a perfectible future in an era filled with repeated crises Life insurance functioned as an important modernist technology within Japan and its colonies to instantiate expectations for responsibility to reconfigure meanings of mutuality and to normalize new social formations such as the nuclear family as essential to life Life insurance thus offers an important vehicle for examining the confluence of modes of mobilizing and organizing bodies the expropriation of financial resources and the action of disciplining workers into a capitalist system **Annals of the American Academy of Political and Social Science** ,1928 **The Future of U.S. Capitalism** Frederic L.
