**Engaging Feminism** Jean F. O'Barr, Mary Weyer, 1992 During recent years the field of women's studies has emphasized the growth of new scholarship on women as scholars began to recover women's history, women's literature and both qualitative and quantitative data about women's lives in disciplines as diverse as classics and psychology, religion and medicine, philosophy and sociology. As a result, argue O'Barr and Weyer in this work, the amount of new material in women's studies is nothing short of staggering. Yet work that addresses itself to the question of delivering this information in the classroom is scarce. We must begin again to examine our early pedagogical commitments this time in light of the expectations of 1990s women's studies students and their campus environment. Fathering and Child Outcomes Eirini

Flouri, 2005-04-08 Over the last twenty years it has become recognized that fathers play a crucial role in child development and subsequent adult status and behaviour. This book presents the state of the art on fathering and its determinants. Based on original research into the effects that different styles of fathering can have on children, it explores the long and short term outcomes of involved fathering on different domains of children's lives including academic achievement, mental health, socio-economic status, adolescent relationships and delinquency. **Handbook on Animal-Assisted Therapy** Aubrey H

Santona, Giancarlo Tamanza, 2025-05-21 Recent evidence from clinical practice and research in the field of Clinical Family Psychology highlights the importance of finding reliable tools and methods for assessing couple and family relationships. Expectations from both clinical services and academics are that professionals can collect reliable information on family relationships even if in daily clinical practice this information is underutilized. These expectations could be fulfilled by the common use of validated measures, tools and methods that guarantee reliable data about family relationships. However, practitioners infrequently use these kinds of measures, tools and methods either because of a lack of knowledge or because the tools are not readily accessible. Clear instructions on how to properly assess couple and family relationships within daily clinical practice are needed, especially since psychologists work in different clinical settings and treat different populations.
