Linear Algebra and Optimization for Machine Learning Charu C. Aggarwal,2020-05-13 This textbook introduces linear algebra and optimization in the context of machine learning Examples and exercises are provided throughout the book A solution manual for the exercises at the end of each chapter is available to teaching instructors This textbook targets graduate level students and professors in computer science mathematics and data science Advanced undergraduate students can also use this textbook The chapters for this textbook are organized as follows 1 Linear algebra and its applications The chapters focus on the basics of linear algebra together with their common applications to singular value decomposition matrix factorization similarity matrices kernel methods and graph analysis Numerous machine learning applications have been used as examples such as spectral clustering kernel based classification and outlier detection The tight integration of linear algebra methods with examples from machine learning differentiates this book from generic volumes on linear algebra The focus is clearly on the most relevant aspects of linear algebra for machine learning and to teach readers how to apply these concepts 2 Optimization and its applications Much of machine learning is posed as an optimization problem in which we try to maximize the accuracy of regression and classification models The parent problem of optimization centric machine learning is least squares regression Interestingly this problem arises in both linear algebra and optimization and is one of the key connecting problems of the two fields Least squares regression is also the starting point for support vector machines logistic regression and recommender systems Furthermore the methods for dimensionality reduction and matrix factorization also require the development of optimization methods A general view of optimization in computational graphs is discussed together with its applications to back propagation in neural networks A frequent challenge faced by beginners in machine learning is the extensive background required in linear algebra and optimization One problem is that the existing linear algebra and optimization courses are not specific to machine learning therefore one would typically have to complete more course material than is necessary to pick up machine learning Furthermore certain types of ideas and tricks from optimization and linear algebra recur more frequently in machine learning than other application centric settings Therefore there is significant value in developing a view of linear algebra and optimization that is better suited to the specific perspective of machine learning

Madam Chief Justice W. Lewis Burke, Joan P. Assey, 2015-12-22 The story of South Carolina's first female Chief Justice with contributions by Sandra Day O'Connor, Ruth Bader Ginsburg, legal scholars, family members and more As a lawyer, legislator and judge, Jean Hofer Toal is one of the most accomplished women in South Carolina history In this volume contributors including two United States Supreme Court Justices, federal and state judges, state leaders, historians, legal scholars, leading attorneys, family and friends provide analysis, perspective and biographical information about the life and career of this dynamic leader and her role in shaping South Carolina Growing up during the 1950s and 60s, Jean Hofer was a youthful witness to the civil rights movement in the state and nation Observing the state's premier civil rights lawyer, Matthew J. Perry Jr, in court encouraged her to attend law school where she met her husband, Bill Toal When she was admitted to the South Carolina Bar in 1968, fewer than one hundred women had been admitted in the state's history From then on she was both a leader and a role model She excelled in trial and appellate work and won major victories on behalf of Native Americans and women In 1975 she was elected to the South Carolina House of Representatives and despite her age and gender quickly became one of the most respected members of that body During her years in the House, Toal promoted major legislation on issues including constitutional law, criminal law, utilities regulation, local government, state appropriations, workers compensation and freedom of information In 1988 she was sworn in as the first female justice on the Supreme Court of South Carolina and twelve years later she was elected Chief Justice, becoming the first woman ever to hold the highest position in the state's judiciary As Chief Justice, Toal modernized not only her court but also the state's judicial system As a child she loved roller skating in the lobby of the post office, a historic building that now serves as the Supreme Court of South Carolina From a child in Columbia to Madam Chief Justice, her story comes full circle in this compelling account of her life and influence Contributors include Joseph F. Anderson Jr, Joan P. Assey, Jay Bender, C. Mitchell Brown, W. Lewis Burke Jr, M. Elizabeth, Liz Crum, Tina Cundari, Cameron McGowan Currie, Walter B. Edgar, Jean Toal, Eisen, Robert L.
