How Are You Going to Pay for That? Ryan Cooper, 2025-09-23 A compelling alternative view of the relationship between our politics and our economy Throughout America structural problems are getting worse Economic inequality is near Gilded Age heights the healthcare system is a mess and the climate crisis continues to grow Yet most ambitious policy proposals that might fix these calamities are dismissed as wastefully expensive by default From the kitchen table to Congress debates are punctuated with a familiar refrain How are you going to pay for that This question is designed to shut down policy pushes up front minimizing any interference with the free market It comes from neoliberalism an economic ideology that has overtaken both parties Proponents insist that markets are naturally occurring and apolitical and that too much manipulation of the economy will make our society fall apart Ryan Cooper argues that our society already is falling apart and the logically preposterous views of neoliberalism are to blame Most progressives understand this instinctively but many lack the background knowledge to make effective economic counterarguments How Are You Going To Pay For That is filled with engaging discussions and detailed strategies that policymakers and citizens alike can use to assail even the most entrenched lines of neoliberal logic and start to undo these long held misconceptions Equal parts economic theory history and political polemic this is an essential roadmap for winning the key battles to come

One Billion Americans Matthew Yglesias, 2024-05-14 NATIONAL BESTSELLER What would actually make America great more people If the most challenging crisis in living memory has shown us anything it's that America has lost the will and the means to lead We can't compete with the huge population clusters of the global marketplace by keeping our population static or letting it diminish or with our crumbling transit and unaffordable housing The winner in the future world is going to have more more ideas more ambition more utilization of resources more people Exactly how many Americans do we need to win According to Matthew Yglesias one billion From one

of our foremost policy writers One Billion Americans is the provocative yet logical argument that if we aren't moving forward we're losing Vox founder Yglesias invites us to think bigger while taking the problems of decline seriously What really contributes to national prosperity should not be controversial supporting parents and children welcoming immigrants and their contributions and exploring creative policies that support growth like more housing better transportation improved education revitalized welfare and climate change mitigation Drawing on examples and solutions from around the world Yglesias shows not only that we can do this but why we must Making the case for massive population growth with analytic rigor and imagination One Billion Americans issues a radical but undeniable challenge Why not do it all and stay on top forever

Crawling Behind: America's Child Care Crisis and How to Fix It Elliot Haspel, 2019 I've totally washed away the dream of having one more child I had never intended to be a stay at home parent but the cost of child care turned me into one We had to pull our toddler out of his program because we couldn't afford to have two kids in high quality care These are not the voices of those down on their luck but the voices of America's middle class The lack of affordable available high quality childcare is a boulder on the backs of all but the most affluent Millions of hard working families are left gasping for air while the next generation misses out on a strong start To date we've been fighting this five alarm fire with the policy equivalent of beach toy water buckets It's time for a bold investment in America's families and America's future There's only one viable solution Childcare should be free

Invisible Americans Jeff Madrick, 2020 A clarion call to address this most unjust blight upon the American landscape Madrick has provided a valuable service in presenting a highly readable and cogent argument for change Mark R Rank The Washington Post By official count more than one out of every six American children live beneath the poverty line But statistics alone tell little of the story In Invisible Americans Jeff Madrick brings to light the often invisible

reality and irreparable damage of child poverty in America Keeping his focus on the children he examines the roots of the problem including the toothless remnants of our social welfare system entrenched racism and a government unmotivated to help the most voiceless citizens Backed by new and unambiguous research he makes clear the devastating consequences of growing up poor living in poverty even temporarily is detrimental to cognitive abilities emotional control and the overall health of children The cost to society is incalculable The inaction of politicians is unacceptable Still Madrick argues there may be more reason to hope now than ever before Rather than attempting to treat the symptoms of poverty we might be able to ameliorate its worst effects through a single simple and politically feasible policy that he lays out in this impassioned and urgent call to arms
